**IT'S THE  
EXPERIENCE**

As the worldwide exclusive licensee of a wide variety of airsoft products and brands, PTS prides itself in helping create the most authentic experiences possible - both on and off the battlefield. Nothing else handles like PTS because nothing else is made like PTS, guaranteed. Each and every brand in the PTS family must pass rigorous testing requirements. And it's only the most realistic, precision engineered and innovatively designed that make the cut. In the end, you can be assured that the PTS family of brands offers a singular opportunity to own one of the finest, most trusted, field-tested brands ever assembled. Welcome to the PTS experience.

**IT'S THE  
EXPERIENCE**

## Battle Arms Development

Battle Arms Development, Inc. is an American owned and operated small business. It was created in 2009 by two firearm enthusiasts and collectors. Specialize in the design, development, and marketing of tools, parts, and accessories of M14/M1A/M1 Garand and AR/M16/M4 style weapon systems.

The BAD-ASS selector is the best known modular AR platform ambidextrous safety selector on the market. It has a modular design that allows you to choose among several provided selector lever types to pick one that best suits your needs and comfort.

License: This airsoft replica is manufactured under authorized BattleComp® license. BattleComp® logo and related brand names are trademarks of Battle Comp Enterprises, LLC in the United States and/or other countries.

## BattleComp

BattleComp® are among the best rifle muzzle devices available in today's market and certainly one of the most well-known and popular muzzle devices. Whereas muzzle brake compensators control rifle recoil extremely well, it is achieved at the expense of reduced flash reduction and very highly concussive shock wave around the muzzle device versus normal flash hiders. Although you can accomplish rapid but accurate multiple shots onto your target with a muzzle brake, the enhanced flash signature and concussion can make a muzzle brake detrimental for lowlight/night combat shooting as well as close proximity shooting with teammates and in confined spaces. The BattleComp® blends the functions of both muzzle brakes and flash hiders by providing the best balance of recoil reduction with only a slight compromise in flash reduction and concussion to create the best battle ready rifle compensator on the market.

EXPERIENCE**

## Centurion Arms

Centurion Arms is founded and owned by Monty LeClair, a combat experienced active duty Navy SEAL sniper who has served on multiple SEAL Teams and is currently the Chief at the US Navy SEAL Sniper School. He is also well-known for having custom built the Mk13 sniper rifle used by fellow Navy SEAL Chris Kyle during his final combat deployments who is known as the most lethal SEAL sniper in America's history.

Former Delta Force veteran, weapons expert, and the "father of the HK416", Larry Vickers, calls Monty "the most weapons savvy SEAL I have ever met". Initially known for custom gun builds and for offering superior quality precision AR barrels, Centurion Arms makes a full range of some of the most innovative and sought after AR rails and AR accessories on the market.

## ERGO Grip

What began as an enthusiast's hobby has grown into a vibrant firearm accessories operation. Production, Sales and Support teams at ERGO have demonstrated what is possible when a passionate group dedicates itself to a common goal. Unified in the company's mission—to provide all shooters with the finest firearm accessories available—the business has continued to grow due to a combination of precision manufacturing excellence and superior customer service.

Based in New Mexico, ERGO develops and manufactures high performance small arms accessories to support civilian, law enforcement and military users. From innovative products like the ERGO Grip and F93 Pro Stock, ERGO Grips has expanded their product line to include a wide range of precision engineered weapon accessories.

## Fortis Manufacturing Inc

Fortis's focus is to provide "Operator" needed strength with exceptional design and aesthetics at an affordable price. Every product designed by FMI TM undergoes a strenuous testing and evaluation period with a diverse group of select professionals, resolving all issues before a product is considered ready for production. It is this philosophy that ensures each product will meet or exceed the heavy demands of the professionals who use them.

Fortis REV™ is an extremely lightweight yet robust free floating rail system. The REV™'s unique design reduces as much weight as possible while maintaining strength by utilizing a 1 piece body design. KeyMod mounting points are located at the 3 & 9 O'clock positions for modularity and additional weight savings.

## GoGun USA

GoGun® USA designs and produces a variety of parts for custom firearms. Their signature ground breaking Gas Pedal grip has changed the way handguns are used. They have a variety of Pistol, Shotgun and Rifle parts for both the tactical and competitive shooter. Obsessed with producing the best brakes on the planet, their answer is the SuperComp Talon Brake and SuperComp™ NoTalon Brake.

The well-known trademarks - Gas Pedal® and SuperComp™ - were registered from GoGun® USA. GoGun® USA manufactures and designs an array of components for custom firearms. Their pioneering and innovative Gas Pedal® grip has altered the way handguns are facilitated. They have a variety of Pistol, Shotgun and Rifle parts. Besides, SuperComp™ Talon Brake and NoTalon Brake are specifically prestigious and popular in the market.

### Griffin Armament

Griffin Armament was founded by a pair of sniper-qualified U.S. Army combat infantry veterans. After leaving the military and armed with the insights from their time served in the military and having considerable technical knowledge, they started Griffin Armament to engineer and produce products optimized to meet the needs of today's combat shooters. Today, Griffin Armament designs and manufactures a variety of specialized and highly effective muzzle devices and rifle sound suppressors for a wide range of end-user needs. PTS is proud to be the exclusive licensee for replica airsoft accessories based on Griffin Armament's products.

### Mega Arms

Mega Arms is a part of Mega Machine Shop which was established in 1984. For many years their primary clientele were from the aerospace, fabrication and heavy-equipment industries due to their precision machining capabilities and reputation for superior quality. Seeing a void in the firearms industry for guns they knew they were uniquely capable of manufacturing, Mega Arms was formed and are, to this day, best known for their design, engineering, and production of precision AR-15 components and distinctive complete rifles that remain unsurpassed in finish and performance quality in the rifle production industry.

License: This airsoft replica is manufactured under authorized Mega Arms license. Mega Arms® logo and related brand names are trademarks of Mega Machine Shop, Inc. in the United States and/or other countries.

### Rainier Arms

Rainier Arms was started by shooting enthusiasts for shooting enthusiasts. Specializing in high end AR15s/M16s, parts & accessories, their motto was: "If we won't use it, we won't sell it." Founded in 2005, Rainier Arms was established (and continues to this day) as a firearms and parts supplier. As time passed, they had a desire for products made a certain way and knew that the only way to make that possible was to make those products themselves. And as evidenced by the popularity of their own products they're off to a good start.

## Unity Tactical

Unity Tactical - "Innovative, Adaptive, Decisive" Unity Tactical LLC was created to provide innovative and cutting edge products. Unity strives to blend form, function, utility, and technological sophistication into cutting edge solutions to common problems. We are not afraid of failure or out of the box thinking but strive for perfection in our products.

License: This airsoft replica is manufactured under authorized Unity Tactical license. Unity Tactical logo and related brand names are trademarks of Unity Tactical, LLC in the United States and/or other countries.

## US PALM

US PALM is dedicated to developing and producing the world's finest firearms enhancements and accessories. One of the things that make US PALM different is that they are constantly working to refine their product lines. While many of their designs are revolutionary, they believe in maintaining an evolutionary product design mind-set. By staying informed through their cadre of industry professionals - including military and police active duty personnel, firearms instructors, manufacturing experts, and technical advisors - they amass the collective wisdom of many to bring new products, or product refinements, that answer the questions and needs of front line war-fighters.

### **PTS RM4 (ERG) Series**

The PTS RM4 series of guns are variations based on the M4/AR-15 platform. The ERG (Electric Recoil Gun) RM4 system represents the continued evolution of the AEG (Automatic Electric Gun). Core features include a mechanical / electrical cut-off with the last round fired, functional bolt release, and simulated recoil via the proprietary Kinetic Feedback System. The included ERG PMAG is specifically designed to work with the auto cut-off system. The ERG is also compatible with standard AEG magazines (though the auto cut-off feature will not be active with these). With its new feature set, the RM4 offers the shooter a degree of functional realism not present in previous generations of AEGs. The PTS AR15 ERG is a perfect training gun for the shooter who desires simulated felt recoil, more realistic firearms manipulation, and the reliability of Electric Airsoft Guns.

#### **Features:**

- Enhanced AEG Gearbox with Kinetic Feedback System.
- Proprietary Recoil System.
- Mechanical / Electrical auto cut-off with last round fired.
- Functional bolt release for firing system reactivation.
- All Metal Billet-style AR-15 receiver.
- PTS RM4 PMAG with adjustable 30 or 60 round capacity.
- Flip-up rear PTS MBUS.
- PTS MOE Handguard, Pistol Grip & Stock.

**IT'S THE  
EXPERIENCE**

### PTS RM4 CQB (ERG)

The PTS RM4 CQB ERG is a perfect training rifle for the shooter who needs a more compact rifle than a full length gun. Featuring a 10.5" barrel (with 14mm CCW barrel threading), it is the ideal CQB AR-15-type gun. The barrel is long enough to keep the user competitive in both outdoor and MOUT environments, yet short enough to be easily manipulated in tight spaces. The CQB-length PTS MOE handguard keeps the shooter's support hand far enough forward to maintain good control and pointability, yet close enough to the shooter's body that gun manipulations remain quick and efficient.

#### Spec:

Magazine Capacity: 30/60 rounds  
 Caliber: 6mm BB  
 Engine: Kinetic Feedback System [KFS]  
 Power Source: 11.1v 15c Li-po/Li-Fe

#### Dimensions:

Inner Barrel Diameter: 6.05 mm, Length – 273 mm  
 Outer Barrel Length: 26.67 cm [10.5"]  
 Overall Length (Retracted): 68.44 cm [26.95"],  
 (Extended) – 76.78 cm [30.23"]

#### Performance:

Rate of Fire: 14+ RPS  
 Velocity: 330-350 FPS

Part No. PT6106803  
 Color Code: 07 Black  
 MSRP: US\$369.95/pc

### PTS RM4 Scout (ERG)

The PTS RM4 Scout ERG is a well-balanced, mid-length training rifle. Featuring a 14.5" barrel (with 14mm CCW barrel threading), it is the ideal rifleman's gun. The standard length barrel keeps the user competitive in both outdoor and MOUT environments. The mid-length PTS MOE handguard allows slightly more real estate for longer grip manipulations, yielding better gun pointability.

#### Spec:

Magazine Capacity: 30/60 rounds  
 Caliber: 6mm BB  
 Engine: Kinetic Feedback System [KFS]  
 Power Source: 11.1v 15c Li-po/Li-Fe

#### Dimensions:

Inner Barrel Diameter: 6.05 mm, Length – 395 mm  
 Outer Barrel Length: 36.83 cm [14.5"]  
 Overall Length (Retracted): 78.74 cm [31.0"], (Extended) – 87

#### Performance:

Rate of Fire: 14+ RPS  
 Velocity: 370-390 FPS

Part No. PT6176803  
 Color Code: 07 Black  
 MSRP: US\$379.95/pc

## PTS PDR-C

What started as a concept gun has been recreated as its airsoft version. Developed for use in confined spaces such as vehicles and close quarter environments, this gun meets the needs of most operators working from a multitude of scenarios. The complete concept and functionality has been translated into the airsoft area.

### Features:

PTS Custom Type Gearbox.

Quick Spring Changing.

8mm Bearings Gearbox.

Milled into the top of the receiver is a 37 slot continuous mil- spec 1913A rail for mounting optics, iron sights, and/or optional carry handles (sold separately).

Polymer receiver.

Fully ambidextrous controls include magazine release, charging handle, and simulated reversible mid ejection system.

Fire control (semi-automatic versus fully-automatic fire) manipulated via the two stage weighted trigger.

Suitable for Lipo 8.4v battery.

Battery stored in the pistol grip.

Compatible with High, mid and standard capacity M4 Tokyo Marui style AEG magazines.

255mm inner barrel.

### Spec:

Weight: 2.46kg

Major Color: Black

Length: 490mm

Barrel Length: 10.5"

Hop-up: Adjustable

AEG Power Mode: 8.4v ~ 11.1v

Fit Battery Pack:

Barrel Thread Type:

Barrel Thread Demeter:

Magazine Capacity:

Bullet Type:

Mini / Pistol Grip (Nickel / Li Po)

Clockwise

14mm

70 Rounds

6mm BB

### Performance:

Velocity: 320 ~ 380 FPS

Part No. PT9046808

Color Code: 07 Black

MSRP: US\$320.00/pc

EXPERIENCE

### PTS PDR-D (G88)

The PTS PDR is a conceptual prototype. The concept is envisioned as an ultra-compact, rifle-caliber personal defence weapon. It is designed to fill the unique role between pistol and rifle, by combining the stealth of the handgun with heavy fire power while greatly reducing any logistical burden. The PDR is comprised of two models: the PDR-D which is for CQB and Direct Action Missions while the PDR-C was designed for those operating in confined spaces, such as armoured vehicles. The PDR-D features a full sized pistol grip, removable forward grip and extended tail section.

#### Features:

- Gas operated recoil blowback.
- Picatinny M1913 Top Rail and front lower rail.
- Reversible Mid Ejection System.
- Press Check Blast Cover.
- Ambidextrous Charging Handle.
- Single Point Sling Mount is used with shoulder holster.
- ERG EPM magazine with adjustable 30 or 60 round capacity.
- Tokyo Marui style 5.56 magazines also compatible.

Part No. TBA

Color Code: TBA

MSRP: TBA

### PTS Mega Arms MKM AR15 (GBB)

The PTS Mega Arms MKM GBBR series of guns are variation based on the M4/AR-15 platform. The Mega Arms GBBR (Airsoft Gas Blowback Rifle) represents the continued evolution of Airsoft guns as training systems.

Precision machined and engineered, the PTS Mega Arms MKM GBBR is a perfect training gun for the shooter who desires realistic firearms manipulation, the reliability of PTS training products and the unique style that only Mega Arms can envision.

#### Features:

- PTS Mega Arms GTR-3H Billet Lower Receiver with flared magazine well.
- PTS Mega Arms MKM AR-15 Billet Upper Receiver with Key Mod Handguard.
- Compatible with all standard Key Mod accessories.
- Ultra lightweight design.
- Skeletonized Trigger.
- Adjustable front and rear sights.
- Collapsible stock.
- Gas operated recoil blowback.
- Functional bolt catch and release.
- Functional forward assist.
- Semi and full auto select fire modes.
- Adjustable hop-up.

#### Spec:

Caliber: 6mm  
 Magazine Capacity: 40 rounds  
 Gas System: Force Velocity [FV]  
 Propellant: Green Gas

#### Dimensions / Weight:

Inner Barrel: Diameter = 6.05 mm Length = 370 mm  
 Outer Barrel Length: 36.83 cm [14.5"]  
 Overall Length: Retracted = 81 cm [32"] Extended = 89 cm [35"]  
 Weight: With mag = 3.2kg [7 lbs] / Without mag = 2.6kg [5.75 lbs]

#### Performance:

Rate of fire: 13+ RPS  
 Velocity: 360-380 FPS

### PTS Mega Arms MKM AR15 (ERG)

The PTS Mega Arms MKM ERG series of guns are variation based on the M4/AR-15 platform. The Mega Arms ERG (Electric Recoil Gun) represents the continued evolution of Airsoft guns as training systems. The PTS ERG series of Airsoft guns features the same firearms manipulations and functions as found on real AR15 firearms. ERG stands for Electric Recoil Gun, and this system represents the continued evolution of the now common Electric Gun. It's core features include a mechanical and electrical cut-off with the last round fired, and simulated recoil via the proprietary Kinetic Feedback System.

The PTS Mega Arms MKM ERG includes a new type of EPM that has a built in follower which is specifically designed to work with the auto cut-off system and can be switched from 30 to 60 round capacity with the flip of a switch. The Mega Arms MKM ERG has also been designed to be compatible with standard AEG magazines.

Precision machined and engineered, the PTS Mega Arms MKM ERG is a perfect training gun for the shooter who desires realistic firearms manipulation, the reliability of PTS training products and the unique style that only Mega Arms can envision.

#### Features:

- PTS Mega Arms Lower Receiver with flared magazine well.
- PTS Mega Arms MKM AR-15 Upper Receiver with Key Mod Handguard.
- Enhanced AEG Gearbox with Kinetic Feedback System.
- Proprietary Recoil System.
- Mechanical / Electrical auto cut-off with last round fired.
- Functional bolt release for firing system reactivation.
- ERG EPM magazine with adjustable 30 or 60 round capacity.
- Locking bolt function (with EPM magazine only).
- Tokyo Marui style 5.56 magazines also compatible.

### **PTS Masada (GBB)**

The PTS Masada is an airsoft GBB (Gas Blow Back) which is based on Magpul® Masada GEN 3 design, completely reproduced in all details. It can be rapidly reconfigured for length, magazine compatibility, stock type, and fire-control set up.

The PTS GBB series of Airsoft guns features the same firearms manipulations and functions as found on the real Masada firearm.

Precision machined and engineered, the PTS Masada GBB is a perfect training gun for the shooter who desires realistic firearms manipulation and the reliability of PTS training products.

#### **Features:**

Gas operated recoil blowback.

Tool-less quick-change barrel system.

CNC machined upper receiver (serialized).

Milled into the top of the receiver is a 37 slot, continuous, military specification 1913 rail for mounting optics.

Flip up iron front sight compatible with standard Airsoft M4/M16 rear sights.

Reinforced polymer lower receiver.

Fully ambidextrous controls include the fire selector, magazine release, and bolt release/bolt lock-back.

Optional rail mounting points are integrated on both the short and long versions of the polymer hand-guard at the 3, 6 and 9 o'clock positions.

Multi-adjustable folding stock can be easily swapped to adapt to changing mission requirements.

14.5" Carbine length barrel.

Part No. PT6126803

Color Code: 07 Black / 13 Dark Earth

## EPM M4 Magazine

The PTS Enhanced Polymer Magazine, or EPM for short, is a new type of Polymer Magazine for airsoft rifles. The EPM is a truly unique magazine, inside and out.

Externally it features a polymer shell, with recessed panels for better grip, and unique magazine well guides that reduce snagging when the magazine is drawn from and reinserted into pouches. The bottom of the base plate has been designed with an angled surface and a rubber over-mold on the lower face. This combination of features allows the end user to rest the gun on any flat shooting platform and have more surface contact with better traction and therefore greater stability. The angled surface is minimized to the point that it is functional, yet still comfortable in the hand when drawn from pouches and also not inhibit the closure of flaps on closed top magazine pouches. The front of the base plate has also been designed with a ribbed ledge which promotes easier extraction of the magazine from deep magazine pouches and can help the end user with correctly indexing the magazine.

### Features:

Simple, clean elegant design with aggressive front and rear textured panels for improved grip during loading and unloading manipulations.

Simulated feed lips adds to aesthetics of realism and aids in guiding the magazine into the gun.

Front magazine well guides keeps the magazine square in the gun and low drag wing design helps the magazine to avoid getting caught on gear when inserting or drawing from magazine pouches.

Unique base plate design with a stepped front ledge tab aids in pulling the magazine out of deep pouches and acts as an index point when gripping the magazine for insertion into the M4's mag-well.

Rubberized over-mold base plate gives the shooter increased surface contact and traction when in shooting positions in which the magazine is resting on a shooting platform.

Dot matrix on the base plate allows the user to mark the magazine with alphanumeric characters or pictograms for identification.

Comes in a full range of colors including Black, Flat Dark Earth OD Green, Urban Gray and others.

Made from DuPont™ Zytel® Polymer.

IT'S THE  
EXPERIENCE

### EPM M4 Magazine (AEG)

The AEG version of the EPM carries all the innovative features as standard on all versions of the EPM but with an added extra feature:

The bullet window with the fake 556 rounds isn't just for show. When the magazine is fully loaded, at the base of the see-through bullet window, an orange follower comes into view. This is a remarkable design feature unique to the EPM as it allows the end user to pick up any EPM magazine and immediately know if the magazine is filled to capacity and ready to go. It also acts a visual indicator for the user to know when to stop loading the magazine. This mid capacity AEG magazine holds 150 rounds with the same reliability that all PTS magazines have long been famous for.

#### Features:

Fake 5.56mm bullet window gives the aesthetics of a real magazine.

Loaded bullet indicator signals when to stop loading the magazine as well as a quick visual reminder to the user that it is a topped off mag in the heat of battle/training.

Compatible with any standard Version 2 based M4 AEGs, including those by TM, KWA, G&P, both the VFC and Classic Army 416, PTS Masada, PTS PDR-C, and the PTS ERG series.

Midcap magazine holds 150 rounds.

Compatible with any standard V2 based M4 AEGs.

Comes in a full range of colors including Black, Flat Dark Earth OD Green, Urban Gray and others.

#### Spec:

Weight: 170g (approx.)

Size: 177 x 85 x 30mm (approx.)

Part No. PT0964503

Color Code: 07 Black / 13 Dark Earth / 40 Olive Drab

### PTS US PALM AK30 Airsoft Magazine

The US PALM AK30 Airsoft Magazine is designed to be utilized by an operator in any condition. The aggressive ridges on the front and rear allow a positive purchase when seating the AK30 into the rifle. The deep waffle pattern on the magazine sides assist in rapid extraction from magazine pouches, and 100% positive manipulation within conditions beyond extreme. Every surface of the AK30 was given careful consideration to benefit the operator working in the harshest conditions on earth.

The PTS US PALM AK30 Airsoft Magazine is virtually identical in appearance and feel with the real AK30 magazine. Like its real counterpart, the PTS AK30 magazine is precisely engineered and produced using reinforced polymer. It has a 150 round bb capacity.

**Features:**

- 150 round capacities.
- Reinforced Polymer outer casing.
- Compatible with Marui style Airsoft rifles.

**Spec:**

- Weight: 220g approx.
- Length: 220 x 32 x 80mm
- Bullet Type: 6mm BB

### PTS Raptor Ambidextrous Charging Handle

The Raptor is truly revolutionary in design & function. From rapid palm "blading" or finger thumb charges of the rifle, the motion is fluid & fast from either strong or support side.

Used unique mechanism by AXTS, PTS Rainier Arms Raptor Ambidextrous Charging Handle comprehensively provides right or left handed users with ergonomic benefit. Not only does PTS Rainier Arms Raptor Ambidextrous Charging Handle deliver advanced training method, but also significantly improves the manipulation time. The catch lever and pull handles both smoothly operate which brings users with a great sense of security.

#### Features:

Positive latch function allows easy engagement from either side of the Airsoft gun with either hand.

The right side of the handle is slightly longer to clear the forward assist and the grip surface is serrated for positive grip control.

A unique mechanism developed by AXTS allows left-handed shooters the ability to mirror the Airsoft gun manipulations done by those who shoot 'righty'.

Allows for easier Airsoft gun manipulations when either loading a round into the chamber or performing malfunction corrections when necessary.

6000 series aluminium alloy with anodized coating.

Specifically engineered to function with the G&P, WA, KWA LM4, series GBB & Systema PDW Airsoft guns.

### **EPG-C M4 Grip**

The PTS Enhanced Polymer Grip-Compact, or EPG-C for short, is a simple yet highly functional polymer pistol grip for the AR15 platform with a more vertical angle than its standard EPG counterpart.

The EPG-C features a reduced, more vertical grip angle for shooters who have adopted the changes in modern gun fighting stances, and gun manipulation techniques where a reduced angle pistol grip may improve weapon ergonomics. A lot of shooters find this grip angle reduces stress and strain on the wrist and also puts the wrist more in line with the trigger for improved trigger control. It allows equal comfort for shooters who wish to run their gun with their stocks collapsed, as well as providing a more natural engagement angle for the fire control hand even in a fully extended stock position.

#### **Features:**

More vertical compact grip angle with improved ergonomics

Aggressive 360° texturing to increase surface traction but strategically panelled with comfort in mind.

Available for both AEGs as well as Airsoft Gas Blowback Rifles.

Comes in a full range of colors including Black, Flat Dark Earth OD Green, Urban Gray and others.

Made from DuPont™ Zytel® Polymer

Part No. PT1234503 (AEG) / PT1244503 (GBB)

Color Code: 07 Black / 13 Dark Earth

MSRP: TBA

**IT'S THE  
EXPERIENCE**

### EPG M4 Grip

The PTS Enhanced Polymer Grip, or EPG for short, is a simple yet highly functional polymer pistol grip for the AR15 platform. The EPG features a conventional M4 grip angle but with dramatically improved ergonomics and aggressive texturing designed as the perfect upgrade for a combat rifle. Engineered to balance the shooter's needs for a wide variety of shooting positions, the EPG is uniquely built to be the ideal universal grip for most users.

#### Features:

Conventional M4 grip angle but with improved ergonomics.

Aggressive 360° texturing to increase surface traction but strategically panelled with comfort in mind.

Base cap at the bottom of the grip allows internal grip access for general storage (GBBR version only). Pistol grip storage compartment will accept CR123 batteries, tools, spare parts etc.

Available for both AEGs as well as Airsoft Gas Blowback Rifles.

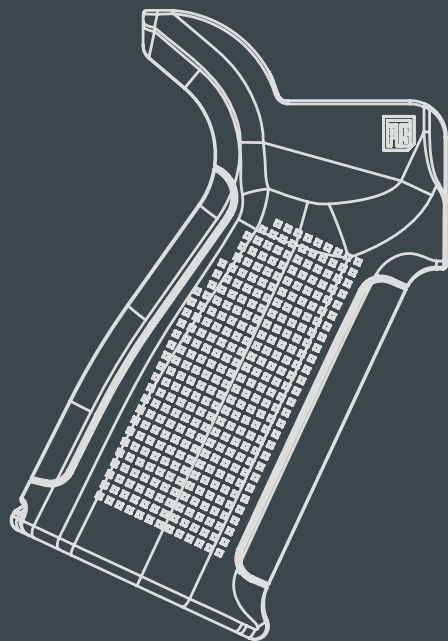

Comes in a full range of colors including Black, Flat Dark Earth OD Green, Urban Gray and others.

Made from DuPont™ Zytel® Polymer.

Part No. PT1234503 (AEG) / PT1244503 (GBB)

Color Code: 07 Black / 13 Dark Earth

MSRP: TBA

### EPF-S M4 Foregrip

The PTS Enhanced Polymer Foregrip - Short, or EPF-S, is a simple yet highly functional short polymer foregrip for any gun needing additional front end support. The EPF-S Foregrip has a carefully conceived streamlined design combined with a non-standard grip angle. The resulting EPF-S is not only stylish but also extremely comfortable to use. The EPF-S has a storage compartment with a sliding access plate at the base to store misc items and tools.

#### Features:

Light weight.

Low-drag snag free design prevents tangling of the gun with molle gear, the user's sling and other kit.

Clean lines and elegant design provides improved aesthetics and ergonomics.

Can be mounted in either direction depending on the shooter's needs and preference.

Flat sides gives the shooter more torsion for improved yaw control when manipulating the rifle.

Aggressive 360° texturing to increase surface traction but strategically paneled with comfort in mind.

Storage compartment for storage of small misc tools and items.

Easy and simple installation.

Compatible with any picatinny railed surface.

Comes in a full range of colors including Black, Flat Dark Earth OD Green, Urban Gray and others.

Made from DuPont™ Zytel® Polymer.

Part No. PT1284503

Color Code: 07 Black / 13 Dark Earth

### EPF M4 Foregrip with AEG Battery Storage

The PTS Enhanced Polymer Foregrip, or EPF for short, is a simple yet highly functional polymer foregrip for any gun needing additional front end support. The EPF Foregrip has a carefully conceived streamlined design combined with a non-standard grip angle. The resulting EPF is not only stylish but also extremely comfortable to use. The standard length EPF has a storage compartment with a sliding access plate at the base, and pass through channels at the top for wiring. This allows the EPF to store certain airsoft appropriate lithium polymer batteries for front wired electric airsoft guns (thereby removing the need for a battery box) or to store other misc items and tools.

#### Features:

Light weight.

Low-drag snag free design prevents tangling of the gun with molle gear, the user's sling and other kit.

Clean lines and elegant design provides improved aesthetics and ergonomics.

Can be mounted in either direction depending on the shooter's needs and preference.

Flat sides gives the shooter more torsion for improved yaw control when manipulating the rifle.

Aggressive 360° texturing to increase surface traction but strategically panelled with comfort in mind.

Storage compartment and pass through channels for battery storage on front wired airsoft guns or storage of small misc tools and items.

Battery storage capacity up to 100mm x 21mm x 16mm.

Easy and simple installation.

Compatible with any picatinny railed surface.

Comes in a full range of colors including Black, Flat Dark Earth OD Green, Urban Gray and others.

Made from DuPont™ Zytel® Polymer.

Part No. PT1274503

Color Code: 07 Black / 13 Dark Earth

MSRP: TBA

### **PTS PDR-C Grip Extension**

By adding the extension firmer purchase of the grip can be achieved for those with larger hands thus providing greater ergonomic stability. The grip texture has been continued along the front and back strap of the grip adding to the users comfort and control. On the inside the battery compartment has been lengthened allowing for larger batteries to be used which has been one of the main demands of the PDR-C users.

#### **Features:**

- Drop-in replacement for PDR-C grip cover.
- Extends grip length by 23mm.
- Extends interior battery compartment by 22mm.
- Secure snap lock fastening.
- Vented base.
- Durable polymer construction.
- Color available: Black.

Part No. PT0934503

Color Code: 07 Black

### PTS Fortis REV™

PTS Fortis REV™ is an extremely lightweight yet robust free floating rail system. The REV™'s unique design reduces as much weight as possible while maintaining strength by utilizing a 1 piece body design. KeyMod mounting points are located at the 3 & 9 O'clock positions for modularity and additional weight savings. It's unique mounting system captures a standard airsoft AR15/M4 barrel nut for easy installation.

#### Features:

Aluminum 6061.

Authentic licensed Fortis markings.

Includes replica Fortis low profile airsoft dummy gas block and gas tube.

Actual Length: 12.429' (12 inch version) / 9.234' (9 inch version).

Rotation Limited QD Sockets and anti-Rotation Tabs (Fits Forged Style Airsoft Upper Receivers).

Contiguous Milspec 1913 Top Rail and Milspec 1913 rail sections at the front of the rail.

True specification KEYMODs mount holes at the 3 & 9 O'clock.

Compatible with most standard (34.5mm) Airsoft AR15/M4.

## PTS ERGO Z-RAIL

Installation of the PTS ERGO Z Rail was quick, easy, and the only tool required was an allen wrench. The two piece drop in system attached in the same manner as the standard handguards do with the addition of four bolts (two on each side). Although this is not a free-float system, it is a good option for those who are budget conscious and it is also a good option for those who are assigned an M4 for their duties and may not be allowed to alter their assigned training tool. The pictured bi-pod slipped onto the lower rail without issues. This handguard is in Carbine AR/M4 length and will not replace mid-length handguards.

### Features:

Providing shooters with an easily installed advantage without barrel removal on the carbine length AR/M4 weapons systems.

Thinner Profile for Forward Control Enhancement.

Lightweight with less permanent installation.

Precision Mounting Platform for the standard carbine handguard replacement without modification.

Four MIL-STD 1913 Picatinny rails enable easy, secure mounting of lights, lasers, vertical grips, backup sights, bipods, and other accessories.

Exclusive side lock system ensures a stable, rattle-free installation.

### Spec:

Material :	6000 Series Aluminum Alloy
Finish:	Black Anodized
Dimensions:	167.5mm x 48mm x 61.4mm
Weight:	280g (Approx. 10 ounces)
Compatibility:	Carbine AR/M4 Length Airsoft System

Part No. FL010490300

MSRP: US\$92.95/pc

IT'S THE  
EXPERIENCE

### PTS ERGO Z-Float Rail

Installation of the PTS ERGO Z Float Rail™ Free Float Handguard is engineered to improve the mission-critical performance of carbine length AR15/M4 airsoft systems. Ideal for shooters who prefer a thin profile, lightweight, more permanent installation, this precision crafted mounting platform features.

It has a unique 2-piece design that it can be installed without taking the Airsoft/Training Weapons' barrel off. This handguard is great for those AR15/M4 Type owners that don't own any gunsmith tool and those that have an airsoft AR15/M4 with permanently attached muzzle device.

#### Features:

Two pieces aerospace aluminum alloy black anodized aluminum construction

Thinner Profile for Forward Control Enhancement.

Anti-Rotational Mechanism : locks onto the stock barrel nut

Easy installation without removing barrel.

Precision Mounting Platform for the standard carbine handguard replacement.

Four MIL-STD 1913 Picatinny rails enable easy, secure mounting of lights, lasers, vertical grips, backup sights, bipods, and other accessories.

Require removal of delta ring.

#### Spec:

Material: 6000 Series Aluminum Alloy

Finish: Black Anodized

Dimensions: 183.3 x 48.05 x 61.5mm

Weight: 320.3g (Approx. 11.3 ounces)

Compatibility: Carbine AR15/M4 Length Airsoft System

Part No. FL011490300

MSRP: US\$98.95/pc

### PTS Centurion Arms C4 Rail System

The PTS Centurion Arms C4 Rail System is a 2 piece free float rail that, when installed, gives AR uppers a continuous 12 o'clock rail. Its features, some of which are patent pending, also include very light weight, integrated QD mount points, the ability to simply install onto a standard barrel nut, and design features that prevent the rail from loosening and rotating under prolonged stress. Several versions are available for multiple applications.

#### Features:

Clamps onto standard airsoft AR15/M4 barrel nuts.

Features 2 built in QD sling swivel sockets.

Free float rail system to enhance accuracy.

Carbine length gas system.

Includes low profile airsoft dummy gas block and gas tube.

### PTS Centurion Arms CMR Rail

The PTS Centurion Arms CMR Rail is a lightweight, rugged, one piece free float handguard that uses a proprietary barrel nut and gives an AR upper a continuous 12 o'clock rail. It was designed with the top 1913 rail for mounting the most common accessories, yet does away with the need for 1913 rail at the 3, 6, and 9 o'clock positions. Accessories can be directly mounted to it with a dedicated, simple, light-weight mount or a conventional 1913 rail section to be added and used if needed. Additionally, the CMR built in anti-rotation QD sling swivels in 4 positions.

The main objective was to have a smaller, lighter weight, more ergonomic K.I.S.S (Keep It Simple, Stupid) hand guard that maintains or enhances functionality.

#### Features:

Material: Aluminum 6061 – T6.  
Features 4 built in QD sling sockets.  
Free float rail system to enhance accuracy.  
Low profile airsoft dummy gas block,  
gas tube and proprietary barrel nut.

Low profile airsoft dummy gas block.  
CMR specific accessories (not included).  
Steel alloy thread inserts for enhanced thread durability. Includes low

### PTS Griffin Armament M4SD-II Mock Suppressor

The real steel alloy M4SD-II sound suppressor is the result of a ten year study of sound suppressor design and a rigorous seven year R&D program pulling from lessons learned in environments from computer design, field testing, to actual combat operations in Afghanistan during Operation Enduring Freedom.

The M4SD II was designed to provide the optimal combination of lightweight, peak performance, and durability. The PTS M4SD-II Airsoft Mock Suppressor is universally compatible with all four of PTS Griffin Armament's replica muzzle devices: the Griffin Armament Tactical Compensator, Muzzle Brake, Flash Suppressor and Flash Comp.

Two versions of the PTS M4SD-II Airsoft Mock Suppressor will be available upon release: a functional foam lined international version and a US import version.

**Spec:**

Material:	Aluminum

### PTS BattleComp 1.0 Flash Hider

PTS BattleComp 1.0 is an accurate reproduction of the original and still most popular BattleComp 1.0. The PTS airsoft replica is available in clockwise and counterclockwise 14mm threading.

**Spec:**

Material:	Precision CNC machined from heat treated steel alloy
Net weight:	50g approx
Dimension:	44 x 22 dia. mm
Finish:	Matte Black (black oxide scratch resistant finish)
Accessory:	Crush washer x 1pc, shim Kit x 3pcs included

Part No. BC001490300 (CW) / BC002490300 (CCW)

MSRP: US\$25.00/pc

### PTS BattleComp 1.5 Flash Hider

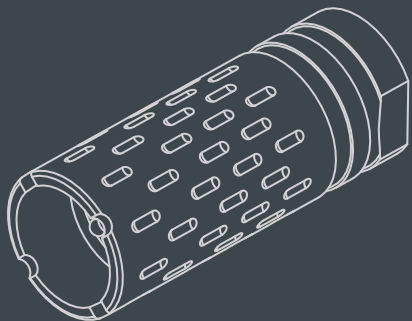

PTS BattleComp 1.5 was designed to have the same capabilities as its BattleComp 1.0 counterpart, however it is an elongated version of the 1.0 variant that when installed on 14.5" barrels extends the overall length to 16.1". The PTS BattleComp 1.5 is an accurate reproduction of the BattleComp 1.5 and is available in clockwise and counter-clockwise 14mm threading.

**Spec:**

Material:	Precision CNC machined from heat treated steel alloy
Net Weight:	110g approx
Dimensions:	55 x 22 dia. mm
Finish:	Matte Black (black oxide scratch resistant finish)
Accessory:	Crush washer x 1pc, shim Kit x 3pcs included

Part No. BC003490300 (CW) / BC004490300 (CCW)

MSRP: US\$27.50/pc

**IT'S THE  
EXPERIENCE**

### PTS BattleComp 2.0 Flash Hider

PTS BattleComp 2.0 is a variant of the original BattleComp® whose external dimensions have been modified to match that of the standard A2 bird cage flash hider in order to be compatible with silencers that were designed to fit over A2 flash hidere. The PTS BattleComp 2.0 replica is available in clockwise and counter-clockwise 14mm threading.

**Spec:**

Material: Precision CNC machined from heat treated steel alloy  
Net weight: 50g approx  
Dimension: 44 x 22 dia. mm  
Finish: Matte Black (black oxide scratch resistant finish)  
Accessory: Crush washer x 1pc, shim Kit x 3pcs included

Part No. BC005490300 (CW) / BC006490300 (CCW)

MSRP: US\$31.00/pc

### PTS Battle Comp BABC Flash Hider

Based on the same precision construction as the original BattleComp 1.0, the BABC (Big A\*\* Battle Comp) was designed as a multi-caliber compensator for larger caliber firearms from 6.5 Grendal, 6.8 SPC, 7.62 NATO to .300 Win Mag and AAC Blackout. The PTS BattleComp BABC is an accurate reproduction of the BattleComp BABC and is available in clockwise and counter-clockwise 14mm threading.

**Spec:**

Material: Precision CNC machined from heat treated steel alloy  
Net Weight: 112.5g  
Dimensions: 61 x 22 dia. mm  
Finish: Matte Black (black oxide scratch resistant finish)  
Accessory: Crush washer x 1pc, shim Kit x 3pcs included

Part No. BC007490300 (CW) / BC008490300 (CCW)

MSRP: US\$32.50/pc

### **PTS Window Breaker**

The PTS Window Breaker is designed as a replica window breaching tool to be mounted onto the end of a replica PTS Griffin Armament Suppressor or PTS AAC Suppressor. Based on a real steel alloy counterpart recently featured in a photo of a US Navy SEAL's AR15 made famous for the mission it was used on. The PTS Window Breaker is designed for rugged use and gives any replica suppressor it is attached to a more aggressive look.

**Spec:**

Material:	CNC Steel alloy
Color Finish:	Dark gray
Weight (including packaging)	approximately 80g
Dimensions (including packaging)	58 x 70 x 30mm
Compatibility	37.5mm diameter Faux Silencers. PTS Griffin Armament, PTS AAC silencers.

Part No. PT0984903  
Color Code: 07 Black  
MSRP: US\$30.95/pc

### **EPS M4 Collapsible Stock**

The PTS Enhanced Polymer Stock, or EPS for short, is a simple yet highly functional collapsible polymer stock for the AR15 platform. The EPS M4 stock has a uniquely comfortable cheek weld, storage tubes on either side that allows for ample storage space for AA, AAA or CR123 batteries and a rear compartment for tools or airsoft batteries for electric airsoft guns.

#### **Features:**

Light weight.

Compatible with mil-spec and most airsoft buffer tubes.

Low-drag snag free design prevents tangling of the gun with molle gear, the user's sling and other kit.

Clean lines and elegant design provides improved aesthetics and ergonomics.

Two different types of ambidextrous sling mounting options, including OD swivel sockets.

Unique side tubes result in a comfortable cheek weld and expanded storage.

Slim profile considering it's significant internal storage space.

Easy and simple installation.

Compatible with both AEGs as well as Airsoft Gas Blowback Rifles.

Comes in a full range of colors including Black, Flat Dark Earth OD Green, Urban Gray and others.

Made from DuPont™ Zytel® Polymer

Part No. PT1254503

Color Code: 07 Black / 13 Dark Earth

MSRP: TBA

### PTS Ergo F93 Pro Stock w/pad

The Ergo F93 Pro Stock is an eight position collapsible stock with one of the longest length of pull and a fixed cheek piece for a constant and repeatable cheek weld in any of the 8 stock positions. The integrated revolutionary locking device has the feel of a fixed stock without the rattling and movement common on many collapsible stocks. The F93 includes an over molded carbine length

#### Features:

Once the butt is locked, the F93 has the feel of a fixed stock.  
8" from receiver to butt plate when collapsed, 12" fully extended.  
AEG version can hold a suitably sized Li-Po battery in the buffer tube  
GBB version is compatible with most airsoft GBB rifles  
Gas Blow Back weight 524g  
AEG weight 495g

### **Enhanced Modular Sling Plate**

The PTS ESP-M is designed for carbine style buffer tubes for the airsoft AR15/M4 and 308 GBBR platform. This uniquely designed QD End Plate will accept either a milspec QD Sling Swivel (not included) or the included Single Point Sling Swivel to give the user a truly versatile sling mountable receiver end plate.

The limited rotation Single Point Sling Quick Attachment Swivel locks in place with a screw and features a hardened steel alloy loop allowing connection to many popular single point sling attachments.

#### **Compatibility:**

KWA/KSC-LM4, PTS Mega Arms MKM AR15, G&P/WA GBB M4 Series, GHK GBB M4, Systema PTW.

#### **Features:**

- Steel alloy construction
- Black oxide finishing
- Fully radiused edges, inside and out to prevent fraying of your sling
- Quick Detach Socket
- Includes a Single Point Sling Quick Attachment Swivel

### PTS Battle Arms Development – Ambidextrous Safety Selector (B.A.D-A.S.S.)

The PTS Battle Arms Development BAD-ASS is a licensed airsoft replica, designed for training and simulation use only. It includes all the selector switches needed to reconfigure the BAD-ASS for the user's requirements. A set of 3 modular selector levers (AEG Version) / 5 modular selector levers (GBB Version) are available with the following character:

Designed with aggressive diagonal grooves provides positive engagement

Round edges for comfort and smooth manipulate of lever

V-Groove Marker

Fluting provides added grip while reducing weight

### PTS B.A.D. Ambidextrous Safety Selector (AEG) Version

AEG version includes:

3 x Modular Selector Levers

2 x Torx Screw with Spring

2 x Plastic Made Safety Detent

1 x AEG Selector Plate

These selectors are the AEG Version; they can only be assembled to the left side of the Airsoft gun.

**Spec:**

Weight: 50g per set (approx.)

Available Colors: Black, Dark Earth

Dimensions: 27 x 12 mm max size of lever

Compatibility: AEG Only. TM, TM SOPMOD, G&P

Part No. BA0014903

Color Code: 07 Black / 13 Dark Earth

MSRP: US\$30.00/pc

### PTS B.A.D. Ambidextrous Safety Selector (GBB) - Mega, G&P, WA Version / KWA/KSC – LM4 Version

GBB version of the BAD-ASS includes:

5 x Modular Selector Levers

2 x Torx Screw

1 x GBB Fire Selector Shaft

**For PTS Mega Arms MKM AR15, WA, G&P System**

### **PTS Unity Tactical - Atom Glock Slide**

ATOM™ allows you to mount nearly any optic using our adaptors to your pistol without the need to mill the slide for each optic. The slide is modified with a large dovetail to contain the adapter. The system is capable of using BUIS with the rear sight mounted in front of the optic. The ATOM™ system assures that your weapon will be future optic compatible (within limitations); and as new optics are introduced to the market, we will release new adapter plates.

Part No. UT0024903  
Color Code: 07 Black / 13 Dark Earth  
MSRP: TBA

### **PTS Unity Tactical - Exo**

EXO™ is a complementary product for the Surefire® X200™, X300™ and X300™ Ultra weapon lights for use on a carbine or long gun. It is a direct replacement for the plastic frame rails and provides a shroud for the activation switch. This gives the user a positive indexing point for light activation as well as providing protection against light AD's during use and storage without impeding access to the switch. EXO™ is constructed out of very strong impact resistant polymer and provides a strengthened mounting interface with the host weapon. It also provides extra protection for the battery compartment latch.

#### **Features:**

- Protects the Switch from Accidental Light Discharge in sensitive environments.
- Protects the light from inadvertent activation during storage or transport.
- Provides a strong attachment point to the weapon through the use of a strong engineered polymer and an increased surface area.
- Provides a good index point for the activation finger.
- Protects the battery cover latch and seal from damage.

Part No. UT0034503  
Color Code: 07 Black / 13 Dark Earth  
MSRP: TBA

**IT'S THE  
EXPERIENCE**

### **PTS Unity Tactical - Fusion**

FUSION™ is a modular, multi-purpose mount designed to give the end user extreme flexibility in mounting options. It was engineered from the ground up to provide a strong mounting base with the widest range of configurations while remaining lightweight and inexpensive.

The system consists of a base with several accessories adapters. The current offerings encompass a wide range of current devices to include lights, lasers, optics, and ancillary equipment. Because the mounting system is standardized we are able to introduce new accessory mounts as equipment changes, reducing time to market and maximizing effectiveness.

FUSION™ was designed to maximize the use of rail space while remaining lightweight and low profile. The interface points are very strong and provide for a very rigid mount. The picatinny rail hub has 4 mounting surfaces; a top surface, forward surface, and two wing surfaces. All wing accessories are reversible.

The combination of equipment configurations is immense and more accessories can be developed to expand the capabilities of the system.

### PTS Performance Arms Sleeves

PTS Performance Arms Sleeves are designed to protect exposed skin from the sun's harmful ultraviolet rays throughout the Anti-UV fabric. Additionally, PTS Performance Arms Sleeves are tailored to be a comfortable stretch fit, made from lightweight, moisture-wicking fabric.

Constructed from premium-grade materials, PTS Performance Arms Sleeves' high-performance polyester fabric quickly and efficiently wicks sweat away from the body and moves it to the fabric surface, where it evaporates, keeping users dry and comfortable even during the most strenuous conditions. The Anti-UV fabric construction provides a minimum of UPF + 30 ultraviolet protections thus preventing sunburn and other sun related illnesses.

**Features:**

Nature UPF + 30 (at minimum).

Anti-UV fabric to protect against UV rays, while keeping you dry and comfortable.

Flat-seam construction to reduce chafing.

90% Nylon & 10% Elasthan.

Part No. PT820830300

MSRP: US\$28.95/pc

### PTS GUNSMITH Short Sleeve Shirt

PTS GUNSMITH Short Sleeve Shirt is a unisex premium grade garment with work-shirt style tailoring, in dark grey with subtle PTS accents. A 1" wide strip of velcro loop is located above the left chest pocket for those who wish to add a name tape type patch, or leave it bare to show off the PTS embossed logo.
