

FIRST SPEAR®

BUILT FOR THE X™

WHAT'S BEHIND THE NAME?

The Primus Pilus, or FirstSpear, was the Senior Centurion of a Roman Legion.

“Centurions were the guardians of Rome. At the height of the Roman Republic there were over five thousand qualified Roman Centurions in the Legions. To be a Centurion required that, in a mostly illiterate society, one be able to read and write clearly, to be able to convey and create orders, to be capable of not only performing every skill of a Roman soldier but to teach every skill of a Roman soldier. Becoming a Centurion required intense physical ability, courage beyond the norm, years of sacrifice and a total devotion to the philosophy which was Rome.

When Rome fell to barbarian invaders, there were fewer than five hundred qualified Centurions. Not because Rome had fewer people but because it had fewer people willing to make sacrifices.

And the last Centurions left their shields in the heather and took a barbarian bride....” (Ringo 08)

FirstSpear® dedicates our work and our efforts to those modern Centurions who hold the line and ensure that our way of life does not fall! It is an honor and a privilege to directly support those at the tip of the spear!

Ringo, John. The Last Centurion . New York: Baen, 2008.

FIRSTSPEAR

FirstSpear develops hundreds of new products a year for some of the most elite military and law enforcement professionals in the world; items built to meet their needs, refined with their input, and proven on the battlefield and in the street. A select few of those items made it in to this catalog. What you will see here is the latest in Load Carriage and Personal Protective Technology. What you will not see here are endorsements from “sponsored athletes.” We do not pay anyone to use our products. When you see the best of the best using FirstSpear at the range, on the battlefield, or responding to a crisis; you can rest assured that choice was made based on the need to have the greatest tactical advantage possible.

TABLE OF CONTENTS

- 06-11 NEW TECHNOLOGIES
- 12-31 PLATFORMS
- 32-41 PACKS & BAGS
- 42-43 FIGHT STRAPS
- 44-59 POCKETS
- 60-61 MEDICAL
- 62-67 ACCESSORIES
- 68-69 HOLSTERS
- 70-75 APPAREL
- 76-79 MERCHANDISE / CONTACT

FIRSTSPEAR® DESIGN PHILOSOPHY

The tactical equipment put forth by FirstSpear® is designed to function interactively as a fighting system. By utilizing the equipment as a system, an overall weight reduction, weight transfer and operational scalability is achieved that is far superior to systems that fail to consider the ultimate challenges that the User must face in an operational environment.

What is integrated into the FirstSpear® product line is reflective of constant dialogue with Users that are at the very tip of the spear. This includes but is not limited to elite organizations within the US Inventory as well as those of other friendly foreign nations that also feel evil is worthy of punishment.

FirstSpear® achieves this relationship by putting complete focus on the User's needs and their overarching requirements. Each subcomponent of the overall system integrates field feedback from concept development through rapid prototyping, and ultimately production and delivery. Impact to the overall weight, form, function and durability is considered in every detail down to fabric and hardware selection.

Platforms, like the Sleeper™, SICR™ & OAGRE™ are designed with direct input from professional Users; built to be durable, lightweight, and highly functional. FirstSpear® incorporates performance driven features that execute both as stand-alone items or integrated into an overarching individual equipment and personal protection system. This system will lower overall weight, reduce bulk off the silhouette contributing to more effective signature suppression and take into account the manipulations required that will benefit operational enhancement.

FirstSpear® remains focused on the User during approach, actions on and exfiltration from the objective, wherever that objective may be and under any conditions. In short, BATTLEFIELD CAPABILITY!

CAPABILITIES

- ⊕ Rapid Design & Prototyping
- ⊕ Private Label Manufacturing
- ⊕ Short/Medium/Large Production Runs
- ⊕ Berry Compliant Certification Available for Most Products
- ⊕ Small Business Certified
- ⊕ AOR1 & AOR2 available for authorized users

As a FirstSpear® customer, you can be confident that in those rare cases that a piece of equipment lets you down, we will fix it or replace it at no cost to you.

FirstSpear® items built to government specific requirements and contracts are guaranteed based on the terms outlined by those programs. We build them to achieve the best combination of weight and durability for a defined continuous use period.

FS TUBES

FirstSpear® is in the business of providing innovative solutions to long unanswered challenges. Our Tubes™ technology reaffirms that position. The common closure method for most Armor Carriers on the market today is to join the cummerbund in the front with hook & loop fasteners like Velcro®. This presents many performance failures. The hook & loop adds weight and bulk; is noisy and wears out quickly; and retains water, mud and snow. From a safety standpoint the hook and loop closure flap allows for cummerbund protection accessories like side plates and inflatable floatation to shift position and misalign from where they should be to provide maximum performance. The common release mechanisms found in most releasable vests typically utilize a variety of cables, routed through a complex maze of channels that when assembled correctly, are clumsy, heavy, awkward and difficult to reassemble. When assembled incorrectly, the results can be catastrophic.

FirstSpear® Tubes™ solve all these challenges. Quick to close and even quicker to doff, Tubes™ are manufactured from lightweight high-performance polymers that exceed the strength of other molded fasteners currently used on Operational equipment. Molded in signature suppressive colors and with a variety of choices for activation, this closure system can be rapidly deployed and completely reassembled in SECONDS.

Let FirstSpear® show you how Tubes™ technology will improve performance, enhance mission functionality, reduce weight and allow you to ditch the cable.

Patent Pending

FS 6/9 MODULAR POCKET TECHNOLOGY

Developed specifically for those Users who have not yet adopted FirstSpear® 6/12™ platforms, the 6/9™ Modular Pocket Technology is not only completely backward compatible with legacy MOLLE/PALS style load carriage or armor carrier platforms, but also offers significant weight reduction over traditional MOLLE/PALS pockets. Due to the flexible nature of the attachment straps and tighter tolerances when compared to traditional MOLLE/PALS, 6/9™ pockets actually mount closer to the body and conform tighter to the platform. Already adopted by Professional Users within the joint US Special Operations Forces community, this system provides many advantages over the traditional MOLLE/PALS system and can further help facilitate transition into the 6/12™ Modular Pocket Technology where the ultimate in weight savings, signature management and tight fit can be achieved.

FS 6/12 MODULAR POCKET TECHNOLOGY

Modular Pockets Compatible with FirstSpear® 6/12™ Platforms

Weight reduction is not just a buzz phrase at FirstSpear® - it is an ethos demonstrated by the 6/12™ pocket line. Utilizing these pockets on FirstSpear® 6/12™ platforms allows the wearer to achieve a weight reduction of over 40% without sacrificing performance and completely eliminates pocket shifting normally associated with traditional MOLLE/PALS style pockets. By removing the heavy nylon webbing, polymer reinforcement and metal snaps of the previous system, not only is weight reduced, but the overall profile of the pocket on the platform is significantly condensed as well, allowing improved signature management in all visual, IR and thermal spectrums.

Simply slide tabs on 6/12™ Pockets through precision cut attachment points on 6/12™ Platforms and secure with hook and loop closure tabs.

Patent Pending

FS 6/12 MODULAR PLATFORM TECHNOLOGY

- Up to 50% reduction in weight & significantly less bulk
- Backward compatible with standard MOLLE/PALS
- Completely eliminates pocket shifting when used with 6/12™ pockets
- Forward compatible with FirstSpear's™ ultra-lightweight 6/12™ pockets
- Enhanced cable management

Weight! There are several philosophies on dealing with weight as it applies to load carriage. Some development has occurred in lightweight materials, but these tend to sacrifice performance. Other developments have taken place in "load transfer" by shifting weight around, but they reduce flexibility while increasing heat retention, bulk and even overall load. FirstSpear® has taken a different approach. We listened to the Users and decided to eliminate the weight and sacrifice nothing.

In the design assessment of current pouch attachment systems, FirstSpear® recognized that the major weight parasite on both the platforms and the attaching pockets is the yards of bulk nylon, snaps and polymer stiffener. The FirstSpear® 6/12™ technology eliminates these components and achieves a 20%-40% reduction in weight per standard Assaulter configuration when compared to current pocket attachment systems.

The FirstSpear® team invested more than a year developing and testing the FirstSpear® 6/12™ Pocket Attachment System. It utilizes state of the art fabric technologies to deliver a completely modular system, compatible with standard MOLLE pockets. From adhesive heat-set backing to laser cut precision attachment points, the 6/12™ system is a completely new, design-engineered solution that meets the need for modular, lightweight load-carriage platforms and pockets.

Additionally, 6/12™ provides greater fabric flexibility on unarmored platforms and tighter mounting of pockets to create a cleaner silhouette that aides in enhanced signature management and mobility. The 6/12™ platform face is completely slick when pockets are removed and allows for easy management of communications cables and wires.

Don't transfer the weight, get rid of it.

The FirstSpear® 6/12™ technology works with FirstSpear 6/12™ or 6/9™ pockets, as well as standard MOLLE.

FS GATOR SILENT CLOSURE SYSTEM

FS Alligator Rapid Access System: Immediate access, high security, no bulk, and zero noise. With one swift pull of a gloved, mitted or naked hand, the FS Alligator Rapid Access System gives you immediate access to flash-bang, smoke or fragmentation grenades. The Alligator can be removed and replaced with a 1" surface-mounted side release buckle, giving you one pocket with multiple options for access and security. Since the Alligator is flexible and conformable, you no longer have large, bulky protrusions of your equipment, no plastic to break, and you can remain streamlined for entry into narrow access areas.

FS TECHNOLOGIES SUPPORT THE "QUIET FIGHT"

The phrase "Low Viz" has been around a long time, but recently it has become the latest tactical buzzword for describing a piece of equipment that is simply presented in a different color in order to conceal its purpose. These efforts fall short of their intended function because their specific use is instantly obvious or the User has not altered their appearance enough to truly be discreet.

Utilizing design input from Professionals involved in the "Quiet Fight," FirstSpear has made significant investments in materials & construction techniques that are not associated with standard tactical equipment. Utilizing this capability is not easy or inexpensive, but if you are in true need of this sort of equipment, FirstSpear has some solutions for you.

In the last decade the changing nature of conflict has placed an even greater need on practitioners of discretionary warfare, surveillance/counter-surveillance, & special reconnaissance. These types of operations are pushing requirements for concealment and item deployment to the absolute limit for both military and security and law-enforcement Professionals. FirstSpear loves a challenge.

Many of the ongoing efforts that FirstSpear is conducting for User's in the field will not be publicized in our catalog, website or other media, because the risk of exposing these capabilities and compromising the people employing them it is too great.

In summary, lose the cargo pants, journalist vest and combat boots (unless that is a look you are going for) and take the steps that will truly help you fade into the background, with the confidence that some of the best you've never seen or heard of have had a hand in preparing this equipment for you.

FS MARITIME

CAPABILITIES TECHNOLOGY

FIRSTSPEAR® GUIDE TO MARITIME CAPABILITIES INTEGRATION

Hostile Environments involve more than just gunfire. Other factors will directly impact our User's ability to survive and successfully complete their missions. Among one of the most demanding and challenging an Operator can face is the Maritime Environment. In addition to armed adversaries, drowning & hypothermia can be every bit as much of a threat to personal safety.

Fortunately, FirstSpear® is all about a challenge!

Making use of several decades of acquired Operational experience in Maritime Operations, FirstSpear® has looked at the needs and mission requirements from multiple angles to offer true Maritime integrated capabilities.

If your mission is taking you back to or beyond the surf zone, check out FirstSpear® because we never left it.

FACTORS TO CONSIDER IN DETERMINING YOUR MARITIME PROTECTION REQUIREMENTS:

WHAT IS NEUTRAL BUOYANCY AND WHY WOULD YOU WANT TO BE "NEUTRALLY BUOYANT?"

The term "neutrally buoyant" refers to a User's ability to float just at the surface of the water, without bobbing like a cork, and to be able to have his or her mouth slightly out of the water, without requiring effort. Neutral buoyancy also allows you to get under the water in the event that you would need to do so. There are many reasons one might need to be able to get under the water including to avoid detection or to duck under a wave on insertion or extraction of an OTB. FirstSpear® provides state of the art Buoyancy Compensation "BC" Inserts for our line of armor carriers. These BC's give the wearer approximately 10lbs of positive lift in seawater to assist the end user in achieving his or her neutral buoyancy.

WHAT DOES "BUOYANCY FACTOR" MEAN?

Every item an Operator wears has a buoyancy factor. Each item's buoyancy factor depends on the amount of water it displaces and the density of the item. For instance, a pure block of lead weighing 5 lbs on land will weigh 5 lbs negative in sea water, as it has a buoyancy factor of zero. However, 5 lbs of bullets on dry land will not be 5 lbs negative in sea water as they have sealed black powder as well as casings made from less dense materials such as brass. Most radios are sealed and waterproof which also changes their buoyancy factor. Everything has a buoyancy factor and understanding the buoyancy factors of your equipment is critical to achieving neutral buoyancy.

WHAT IS THE EASIEST WAY TO FIGURE HOW MUCH LIFT I NEED TO MAKE MY KIT NEUTRALLY BUOYANT?

It is simple; take all of your operational kit, put it in the water, and let it soak for a minimum of ten minutes. This will allow your kit to fully deplete itself of any air pockets and become fully saturated. Next, hook your kit together as tightly as possible and weigh it hanging from a scale at the surface of the water (not out of the water, but at the surface). The number your scale measures tells you how negative your gear is and where to start when it comes to offsetting and making your kit neutrally buoyant.

PERSONAL BUOYANCY?

Every person's body is different due to their individual mass and density. Two men who weigh the same will most likely not have the same density, so therefore they will not have the same negative buoyancy. After getting in the water and allowing your clothes to become full saturated, grab hold of the same scale that your kit is hanging from (grab below the surface). Allow your lips or nose to be out of the water and hang, as this will give you the amount of positive lift you will need to fully compensate for your negative buoyancy factor and become neutrally buoyant.

DIP TEST

It is always extremely important to perform a "Dip Test" with your gear. It is not acceptable to just assume you are good. If your kit changes, then you need to compensate for the piece of gear that was added or removed. Don't be that guy that took a shortcut; it could make for a long night.

HARD CELL OR CLOSED CELL FOAM VS. INFLATABLE?

This is an old argument that dates back to the BC timeframe. Which is better, closed cell foam or inflatable? It is first important to understand that closed cell foam creates buoyancy by encapsulating air into tiny pockets. To gain the amount of lift you may require with closed cell foam can become very bulky and in normal operations you only need the flotation for a short period of time. Carrying around a lot of extra foam adds weight and bulk, restricts movement, and can add significant heat build-up and increase overall heat stress. At FirstSpear® we believe in using a hybrid approach of small portions of technically advanced closed cell foam and inflatable chambers to properly achieve neutral buoyancy only when you need it. This allows you the option of deflating your BC Inserts when you are out of the AO that required them during your operation. Not only does this approach aid in your ability to adjust your personal protective equipment (PPE) to the fight, it keeps the foam from being exposed directly to the water, thus keeping it dry and light.

TACTICAL AID TO FLOTATION

FirstSpear® believes in the combination of BC Inserts to get to neutral buoyancy in conjunction with manually activated tactical aids to flotation.

It is important to note that FirstSpear® does not produce or claim to provide PFD's (personal flotation devices) or life saving devices. We provide the best "Tactical Aids to Flotation".

HOW MUCH LIFT IS ENOUGH FOR A "TACTICAL AID TO FLOTATION?"

Our Tactical Flotation Cummiebund provides the following:

- 45lbs of lift at a depth of 33fsw
- 57lbs of lift at a depth 15fsw
- 80lbs of lift on the surface in salt water

Why do we provide so much lift? It is important to note the lift we are looking to provide is not at the surface, but at depth. Our goal is to allow you, the equipped Operator, the ability to exit a crashed helicopter or sinking vessel at depth and to get you and potentially another victim to the surface. The 80 lbs of lift on the surface is simply a byproduct of the lift needed at depth. Our bladders are sized properly to allow for 80lbs of lift at the surface, eliminating the need for a blow off valve, commonly used on other flotation devices.

Oh yeah, if you are that guy that didn't do a dip test, this is where we have your back; you are going up when you pull the handles.

AUTOMATIC ACTIVATION OR MANUAL ACTIVATION?

The problem we see with automatic inflation is they can go off when you don't want them to, potentially trapping the end users in a over turned vessel or inside a sinking helicopter. It is important that the user clears the hazard prior to activation of their tactical aid to flotation.

CO2 QUICK REFERENCE GUIDE.

If used with a properly sized bladder, each gram of CO2 will give approximately 1lb of lift at the surface in sea water. FirstSpear® Inflatable Tactical Flotation Aids are standardized on 38 gram CO2 filled cartridges (P/N 86121Z 2W134 weighing 147 grams each). These cartridges are available in small or bulk quantities through direct sale via a FirstSpear® authorized Dealer.

FirstSpear® references all lift or buoyancy in Sea Water (that is salt water for you land lovers).

COMPLETE ARMOR SOLUTIONS

FirstSpear® partners directly with select armor manufacturers to achieve specific hard and soft armor ballistic protective results that work with our carriers. We only work with manufacturers who make a product worthy enough of being put in our systems and carried by a Professional User.

Defining ballistic requirements can sometimes be difficult to accomplish, levels of threat protection, military capabilities and departmental policies are but a few of the factors that must be considered. FirstSpear® offers two basic selections for your initial consideration. In both hard and soft armor we have available the latest NIJ .06 ballistic protection to answer law enforcement and security requests. Also in both hard and soft armor we offer integrated ballistic solutions that meet threat specifications levels mandated to protect SOCOM Personnel under SPEAR BALCS Operational Requirements.

Contact us with your requirements and specific needs, we are standing by to execute.

FS ARMOR SOLUTIONS

FirstSpear® Armor Solutions, a few things to begin considering.

“WHAT ARE THE THREATS I AM FACING?”

The threat you will be facing is one factor that should be considered in your selection of Body Armor. This is not always easy, however, many reputable resources provide information that can be used in your decision for both Foreign and Domestic environments. Among them are the FBI Uniform Crime Report (UCR) and published Reports such as the Bureau of Justice Statistics Selected Findings “Guns Used In Crime” paper. Through interaction with several Government agencies and related Operational experiences, several things have been proven over time and foremost among them is that Body Armor saves lives.

THE QUESTION THAT YOU AS AN OPERATOR NEED TO ASK IS: “HOW MUCH DO I NEED?”

Weight reduction does not just occur with better platforms. The ballistic protective components that are inside the carrier are a critical factor in the overall system weight. Some Operational personnel cannot have a say in their armor selection. For those who do, or one day hope to, FirstSpear® has been hard at work on this challenge. This year FirstSpear® will bring forward several different soft armor packages that will be labeled FirstSpear® and certified by the National Institute of Justice (NIJ).

“DOES THE WEIGHT AND THICKNESS OF MY BODY ARMOR SYSTEM MATCH MY TACTICS, TECHNIQUES AND PROCEDURES EMPLOYED OPERATIONALLY?”

Specific threat projectiles require proportional amounts of weight and mass to make effective, survivable stops. Are the threats that you commonly mandate actual threats in your Area of Operations (AO) or are they a blanket statement? This should be a frequently asked question particularly when selecting a soft armor insert for a Hard Armor Plate solution. If your TTP is to make use of dynamic movement, rapid entry and Initiative Based Tactics (IBT), then attention must be paid to the overall weight and bulk of the armor system employed.

“IS MY REQUEST THE STANDARD RESPONSE OR UPDATED TO CURRENT OPERATIONS?”

Frequently FS Users will request a NIJ IIIA.06 Soft Armor Insert for their FS Plate Carrier. When asked why they desire a soft solution that has excessive bulk and weight, the common answer is “my agency, department etc. requires us to have protection from .44 Magnum....” This level of protection for the area covered by a plate can add as much or even more than ¼ pound to each side of the carrier!

A SIMPLE REVIEW OF UNCLASSIFIED, PUBLISHED INFORMATION WILL SHOW THE FOLLOWING WORTH CONSIDERING:

Some studies of guns used in homicides provide information about caliber - McGonigal and colleagues at the University of Pennsylvania Medical Center studied firearm homicides that occurred in Philadelphia: 145 in 1985 and 324 in 1990. Most of the firearms used in the homicides studied were handguns: 90% in 1985 and 95% in 1990. In Philadelphia, handguns most often used:

In 1985, of 91 homicides	In 1990, of 204 homicides
44% .38 caliber revolver	18% .38 caliber revolver
19% .25 caliber pistol	6% .380 caliber pistol
14% .22 caliber revolver	16% .22 caliber revolver
14% .32 caliber revolver	10% .32 caliber revolver
3% 9 mm pistol	23% 9 mm pistol
2% .357 caliber revolver	16% .357 caliber revolver

The Virginia Department of Criminal Justice Services studied 844 homicides that occurred in 18 jurisdictions from 1989 through 1991. Firearms were identified as the murder weapon in 600 cases. Over 70% of the firearms used were handguns. Of those handguns for which the caliber and firing action could be identified, 19% were .38 caliber revolvers, 10% were .22 caliber revolvers, and 9% were 9 millimeter semiautomatic pistols.

The Hawaii Department of the Attorney General, Crime Prevention Division, studied 59 firearm-related homicides in Honolulu from 1988 to 1992. Handguns were used in 48 homicides (over 80%) including 11 handguns of 9 millimeter caliber, 10 of .357 caliber, 10 of .38 caliber, and 5 of .25 caliber.

What caliber guns are used in the killings of law enforcement officers?

From 1982 to 1993, of the 687 officers who were killed by firearms other than their own guns, more were killed by .38 caliber handguns than by any other type of weapon.

Type of firearm	Percent of law enforcement officers killed with a firearm
.38 caliber handgun	25.2%
.357 magnum handgun	12.1%
9 millimeter handgun	9.5%
12 gauge shotgun	7.4%
.22 caliber handgun	5.4%
.22 caliber rifle	4.4%

 Wright, James D., Peter H. Rossi, and Kathleen Daly, Under the Gun: Weapons, Crime, and Violence in America (New York: Adline de Gruyter) 1983.

Just this brief research indicates that there is a large amount of extra weight being carried for a threat that may not be very prolific in the Area of Operation that you deploy in and worthy of consideration. FirstSpear® is always standing by to assist you with determining your ballistic requirements and offering suggested ballistic packages that will support your mission.

MARITIME ASSAULT PLATE CARRIER SYSTEM

TUBES 6/12 MOLLE COMPATIBLE MARITIME

Patent Pending

A complete kit for utilization of a Ballistic Armor Plate Carrier in an Operational Maritime Profile

Contains a 500D Nylon backed Plate Carrier with sized Inflatable Floatation Cummerbund, a 2" Belly Band and Buoyancy Compensation Inserts. With highly water-resistant, lightweight materials, adjustment and comfort, this system offers full flexibility and enhanced safety for operations in a Maritime environment. It is sized to fit plates in either the "Swimmer" or ESAPI/SPEAR cuts. Buoyancy Compensation Inserts help maintain a slightly neutral capability while transporting a basic load of equipment. Both wings of the Maritime Assault Plate Carrier's Front Panel have pockets with adjustable tie downs that can hold radios similar to the size and shape of the AN/PRC-148 (MBITR) or AN/PRC-152 (MBHH) and can even be adjusted to fit the 60 Round Surefire M4 Magazine. Utilizing the latest in FirstSpear® technologies, including the 6/12™ pocket attachment system and TUBES™, this is a state of the art capability designed to support Maritime Assault Operations

WORKS GREAT WITH:
6/12™, 6/9™,
or MOLLE/PALS pockets

WEIGHT: 3.625 lbs

This system is tailored specifically for Open Water Maritime Operations. Combining the elements of Ballistic & Maritime Safety along with the considerations for cooler temperatures normally associated with open water nautical operations, the system Utilizes Trelleborg materials on the front face and Rubber Open Cell Sponge w/ Polyester Laminate on the side closest to the body. This system will not only aid in heat retention for the torso, but also recover rapidly from seawater exposure with a simple fresh water rinsing. The complete system contains a sized Inflatable Floatation Cummerbund, optional 2" Belly Band, removable Buoyancy Compensation (BC) Inserts, and is sized to fit plates in either the "Swimmer" or ESAPI/SPEAR Cuts. BC Inserts help maintain slightly neutral capability while transporting a basic load of equipment. Both wings of the Strandhogg Maritime Plate Carrier Front Panel have pockets with adjustable tie downs that can hold radios similar to the size and shape of the AN/PRC-148 (MBITR) or AN/PRC-152 (MBHH) and can even be adjusted to fit the 60 Round Surefire M4 Magazine. Utilizing the latest in FirstSpear® technologies, including the 6/12™ pocket attachment system and TUBES™ this is a state of the art capability designed to support Maritime Open Water Operations. Available in Grey and Coyote.

Soft Armor Ballistic Inserts complying with NIJ Category IIIA.06 or specific Military Specification requirements are available from FirstSpear® for an additional fee. Please call for pricing.

TACTICAL FLOATATION SUPPORT SYSTEM (TFSS)

The Tactical Floatation Support System (TFSS) is an inflatable flotation device specifically designed for warfighters, combat swimmers, and/or maritime airborne operations personnel. It has been designed and tested for use during egress from a submerged structure of any type. The TFSS was designed to provide 45lbs of positive flotation in seawater at a depth of 33 ft., 57lbs of positive flotation at a depth of 15 ft., and 80lbs of flotation on the surface, allowing the wearer a maximum load-out of equipment. Fitting seamlessly on to the AGB, the TFSS has discernible features that separate left from right and are packed with CO2, ready for deployment. The TFSS in this configuration is NSN'd by the US Navy and has a US Army Development Test Command (DTC) Safety Confirmation that covers both Static Line and Military Free Fall (MFF) operations. Sold as a pair (one left & one right)

WORKS GREAT WITH:
All FirstSpear® Platforms
& AGB

WEIGHT: 0.70 lbs each

MSRP: \$479.44

AOR1 & AOR2 available
for authorized Users

Part #: 15-00080

FLOATATION CUMMERBUND RETRO-FIT

Upgrade your existing armor carrier to a 6/12™ & TUBES System with integrated floatation. Built around the Tactical Floatation Support System (TFSS), the FirstSpear Floatation Cummerbund Retro-Fit kit is easily installed and provides the same amount of lift as the standard TFSS. The floatation is deployed by pulling in a down and outward direction, which initiates the CO2 and inflates the bladders.

Government Use Only

WEIGHT FOR MEDIUM CARRIER:
1.90 lbs
MSRP: \$428.46
Add \$24 for Multicam
Part #: 12-00013

Patent Pending

Taking its name from an Old Norse Viking term for a lightning raid, Strandhogg was one of the first formalized battle tactics to use covert infiltrators in advance of an actual raiding operation. Strandhogg was a tactical game changer in its time, just like the technological advances FirstSpear® is bringing forward in this line of plate carriers.

The Strandhogg MBAV Cut Plate Carrier utilizes a time proven ballistic footprint that affords the User more pocket attachment area than designs that are cut edge-to-edge. It can be worn with or without a soft armor panel, depending upon ballistic requirements, threat conditions and the type of plate utilized. Maximizing the new lightweight 6/12™ technology and rapid closure systems provided by The Tubes™, the MBAV Cut Plate Carrier can be rapidly donned or doffed and is capable of accepting the Assaulters' Floatation Cummerbund. Using a streamlined fit throughout, along with state of the art materials and production technology, the 6/12™ MBAV Cut Plate Carrier is easily tailored for comfort, ventilation and fit.

Soft Armor Ballistic Inserts complying with NIJ Category IIIA.06 or specific Military Specification requirements are available from FirstSpear® for an additional fee. Please call for pricing.

STRANDHÖGG SAPI CUT PLATE CARRIER

TUBES 6/12 MOLLE COMPATIBLE

WORKS GREAT WITH:
All FS 6/12™ Pockets, ECP™
WEIGHT: 1.70 lbs
MSRP: \$428.47
Add \$24 for Multicam
Part #: 12-00026

Patent Pending

Cut edge-to-edge to specifically fit SAPI/ESAPI/SPEAR Cut Plates sizes S-XL, this system can be worn with or without a soft armor panel depending upon ballistic requirements, threat conditions and the type of plate utilized. Maximizing the new lightweight 6/12™ technology and rapid closure systems provided by The Tubes™, the SAPI Cut Plate Carrier can be rapidly donned or doffed and is capable of accepting the Assaulters' Floatation Cummerbund. Using a streamlined fit throughout, along with state of the art materials and production technology, the 6/12™ SAPI Cut Plate Carrier is easily tailored for comfort, ventilation and fit. The interior pocket includes foam for added comfort when used with a stand-alone plate. The internal foam is easily removable and replaced with cut-to-fit soft armor inserts for use with ballistic plates.

Patent Pending

Soft Armor Ballistic Inserts complying with NIJ Category IIIA.06 or specific Military Specification requirements are available from FirstSpear® for an additional fee. Please call for pricing.

SIEGE-R OPTIMIZED NEW

Rapidly Released Armor Carrier

TUBES 6/12 MOLLE COMPATIBLE

WORKS GREAT WITH:
Groin Protector, Deluxe Shoulder Pads & MASS

WEIGHT: 3.11 lbs

MSRP: \$574.98

Add \$25 for Multicam

Part #: 12-00145

After collecting and analyzing 3 years of valuable feedback from FirstSpear Professional Users about our popular Siege R, we are proud to release the NEW Siege-R Optimized. The standard shoulder pads are now padded and fully adjustable, including two sets of Tubes in the front and back for rapid switch-out to the enhanced MASS Shoulder System. The front and back plate pockets are now internal to the vest, making the system slimmer and better suited for confined & tubular spaces. The internal bellyband is now removable for those who do not wish to use it all the time, and the exterior cummerbund is now enhanced in the back with the new FS High Performance Elastic Webbing, now a standard in all of our new armor carriers. Finally, our quick drying airflow mesh is now utilized on the interior to reduce overall weight and shed water more quickly. The new Siege-RO truly is optimized for all missions and conditions!

The product fits Soft Armor cut to the shape requirements specified for US SOCOM SPEAR BALCS and Hard Armor plates cut to SAPI/ESAPI/SPEAR and Swimmer in the corresponding soft armor size (ie. Medium Plate and Medium Soft Armor fit a Medium SIEGE R™).

Soft Armor Ballistic Inserts complying with NIJ Category IIIA.06 or specific Military Specification requirements are available from FirstSpear® for an additional fee. Please call for pricing.

Patent Pending

MASS Shoulder Straps
MSRP: \$37.98
Add \$2 for Multicam
Part #: 15-00359

Improved to optimize the Modular Armor Supplement System (MASS) these shoulder straps add additional armor protection where requested by Users of the SIEGE-R.

M.A.S.S.

Modular Armor Supplement System

Front

Back

WORKS GREAT WITH:
Sleeper™, Strandhogg™, Siege-R Optimized

The MASS™ offers armor augmentation that is easy to employ, completely ballistic integrated and a significant comfort upgrade. The MASS™ is an excellent alternative to traditional, less thought through systems, as it subscribes to the tenet that when additional armor is necessary, it is time

to get all you can functionally employ. MASS™ gives additional protection to the neck/throat region, shoulders and upper arms. To don this item, simply put the MASS™ on first and place your FirstSpear® armor carrier on over the top of it.

OVERLAP™ CUMMERBUND NEW

TUBES 6/12 **MOLE COMPATIBLE**

WORKS GREAT WITH:
All FS 6/12™ Pockets, Strandhögg™, Assaulter Armor Carrier.

WEIGHT: .550 lbs
MSRP: \$139.98
Add \$8 for Multicam
Part #: 15-00381

Soft Armor Ballistic Inserts complying with NIJ Category IIIA.06 or specific Military Specification requirements are available from FirstSpear® for an additional fee. Please call for pricing.

Responding to a specific request from a FS Professional User at the Tip of the Spear the Overlap™ Cummerbund has been designed and engineered to provide additional overlapping soft armor at the front side of the plate carrier where the Tubes™ closure system meets. The additional soft armor tucks in behind the Tubes™ allowing full opening and closing of the vest.

The body side of the Cummerbund has been modified to allow the attachment of Ragnar™ Pockets so that magazines and other items can be held in close to the body making for an even more streamlined silhouette. This feature is particularly attractive for Users trying to carry more magazines than traditional front loading of the carrier will allow, tubular assaults or working in the tight confines of a conventional vehicle.

The overlap cummerbund will integrate with a number of FirstSpear carriers including the SAPI or MBAV cut Strandhögg and Assaulter Armor Carrier.

ADAPTIVE CUMMERBUND, SECTION SPECIFIC NEW

ADAPTIVE CUMMERBUND, FLOTATION
MSRP: \$759.98 **MARITIME**
Add \$8 for Multicam
Part #: 15-00479

Mission effectiveness is all about flexibility, the objective, environment and what you need to carry is often times changing and FS wants to provide the flexibility to change with it. Last year we introduced the Purpose Built Front Plate Carrier Panel which used our Tubes system to rapidly switch out a front panel to best suit the weapon you had to carry. This year we improve upon that with the Adaptive Cummerbund, Section Specific. Simply adjust your back insert for where you want your Tubes placed and how tight you want your carrier, this is the last time you need to work with the back cummerbund tunnel, now you are set up to Tube in sections for Flotation, Modular Panels with Ballistic Inserts and upcoming purpose built sections as fast as you can re-release and secure a Tube! Cummerbunds are sized and available for all current ballistic soft armor inserts. Optional Side Plate Pockets are available.

Soft Armor Ballistic Inserts complying with NIJ Category IIIA.06 or specific Military Specification requirements are available from FirstSpear® for an additional fee. Please call for pricing.

MARITIME

The Tactical Flotation Support System (TFSS) is an inflatable flotation device specifically designed for combat swimmers, and/or maritime airborne operations personnel. It has been designed and tested for use during egress from a submerged structure of any type. Will provide 45lbs of positive flotation in seawater at a depth of 33 ft., 57lbs of positive flotation at a depth of 15 ft., and 80lbs of flotation on the surface, allowing the wearer a maximum load-out of equipment.

DECEPTOR™ NEW

WEIGHT: 0.555 lbs
MSRP: \$215.98
does not include armor
Part #: 90-00054

Designed to conceal Rifle Velocity Protective Plates in high threat environments the Deceptor™ will discretely hold a pair of special threat plates and if desired two 6"X6" Rifle Side Plates. Pockets from the Ragnar Series can be quickly attached to the front or the back of the carrier as well. The Deceptor shines with plates in the 2.2 to 4.5 pound size medium weight range and are .75" or thinner. For larger, thicker or heavier plates you need to consider another capability. This carrier comes with stretch and non-stretch shoulder straps to accommodate User comfort preference.

Special Note on Soft Armor: If you are looking for an easy to use & adjust ultra discrete soft armor carrier that can accommodate special threat rifle plates you might want to consider the Deceptor.

FS has a range of soft armor inserts cut in plate shapes as well as our UC Special Threat Plate that will fit the Deceptor, additionally the soft armor cummerbund of the popular NOC will fit onto this carrier as well.

FIRST ON™

FS TUBES

WEIGHT: 0.755 lbs
MSRP: \$99.98
Part #: 12-00069

Plate Carrier Designed and developed out of specific need for those who find themselves first to a crisis. The First On will go on quickly and easily over your duty soft armor and blouse. Keeping essential features in the forefront of the design and removing items that will not be required for limited duration use, the First On keeps weight and bulk to an absolute minimum while utilizing FirstSpear's patent pending Tubes closure system to make for a speedy on and off. Magazine pouches integrated for standard 30 round 5.56 Patrol Carbine and shoulder attachments are in place for most common radio hand mikes.

NOC™ NON-OFFICIAL COVER

The Latest Innovation in Concealable Armor for the Professional User

Patent Pending

Soft Armor Ballistic Inserts
available for NIJ Category
IIIA.06 or specific Military
requirements as requested

WORKS GREAT WITH:
First On and The Slick

WEIGHT: 4.405 lbs (Size Large)

Contact FirstSpear for pricing
and availability

Part #: 17-00100

MSRP: \$794.54

The FirstSpear NOC is the first concealable vest system that provides true flexibility and superior comfort, allowing the wearer to tailor his or her protective equipment (PPE) to a specific assignment or situation. This capability, when used in conjunction with a FirstSpear Slick or First On, gives the FirstSpear Professional User the ability to easily adjust his or her individual ballistic protection level and profile to regulate heat retention while managing weight and bulk.

With a slim fit and unique style lines the NOC has a simplified sizing scheme that eliminates all the previous sizing and sustainment challenges formerly found in traditional concealable soft armor carriers. As a by-product of the novel removable and sized side armor inserts, the NOC is a vest you can grow with. Side armor inserts can be replaced thus eliminating all ballistic gaps on the User's side while still meeting NIJ/Mil-Spec requirements for overlap. The side soft armor can be removed for the most discreet missions.

The front panel pocket of the NOC will accept our thin Light Fighter Series of Plate as well as several different styles of impact and ballistic style protective plates. Clean edges and proportional flare in the right places provide maximum comfort and fit even when seated. The NOC will line up perfectly as a modular or "in-conjunction" component for the Slick or First On; giving you the ultimate scale up and scale down flexibility for varying ballistic threats and changing mission profiles.

Putting on the NOC is easily accomplished with two stabilizing straps that are easy to rapidly adjust, provide complete stability of the ballistic inserts and have smooth surface treatment throughout the outside, minimizing bunching and "print" when you are wearing the NOC underneath your shirt. The unique design makes the NOC the most comfortable, flexible and functional concealable soft body armor system on the market

FEATURES:

- Slim design
- Reinforced, highly durable strapping to prevent sag and rolling
- Side panel system eliminates ballistic gaps during activity and are easily replaceable for changes to body mass
- Moisture wicking anti-Microbial fabric
- External Plate pocket to hold special threat (light fighter) plates or traditional soft trauma inserts
- Comfortable contours to body shape for female users
- Internal ballistic suspension system for improved weight distribution and soft armor panel position
- Independent Side Panel Suspension to provide superior flexibility and secure closure

RETRO-FIT CUMMERBUND 6/12™

Part #: 12-00056

VERTICAL ENVELOPMENT PACK, VEP ^{NEW}

FS TUBES

FirstSpear is changing the game, again!

The VEP is a top opening, rolled closure & Tubes secured Assault Pack that can be mounted to FS Modular Plate Carrier's and flipped over the head for quick access to contents inside or left hanging on the front when traveling seated for long periods of time. Developed to "go forward from the Objective Rally Point (ORP)", the VEP provides the Assaulter with a unique capability that augments the full spectrum of modern combat operations. The VEP can be carried with its own shoulder straps (included) for conventional use without a plate carrier.

The size parameters of the first VEP make it an edge to edge fit on carriers cut for the Swimmer/ Shooter M - XL, SPEAR/SAPI M to XL or the MBAV S/M, L/XL & XXL.

The VEP provides the Shooter with a clean unencumbered shoulder pocket when shoulder firing a weapon, minimizing under arm "clutter". The Pack & Carrier can be removed and reassembled as one making quick work for casualty inspection and treatment. Front hanging feature provides additional safety and comfort during infiltration seated on armored vehicles and helicopters. Easy individual access into the VEP for NVG's, spare ammo etc. creates faster, smoother transition through operational continuum speeding up the overall readiness of the entire element. Rapid jettison of FS Plate Carriers does not change with or without the VEP on!

FIELD RUCK ^{NEW}

6/12 MOLLE COMPATIBLE

Scaled down and tailored for use in varied conditions the FS Field Ruck takes many of the more popular feature of our HOTEL 23 and lightens the overall pack while forgoing some adaptability. Side wings can vertically secure Tripods, Rockets and similar diameter equipment as well as long guns and secure those items with durable 1.5" webbing straps secured with prominent side release buckles that are easy to find even in the dark and uncomplicated to work with even with gloves on.

Drag handles and the proven quick release shoulder strap adjustment buckles are marked in off color webbing to make identification of the features quick and easy. Divider walls provide organization within the main compartment and for maximum space inside the packs those divider walls can be simply pushed out of the way. The generously padded waist belt is easily slid out and removed to support operations where it might be a hinderance and for times when it is desired 6/12 modular pocket attachment panels are available to optimize it.

An extension skirt on the top of the main compartment is rolled and secured with a side release buckle and the top lid is quickly removable for use as a small storage system on its own, the main pack can be secured and transported on its own. A quick access zipper is provided so that the main compartment does not need to be unrolled to gain access. Comfortably sized for moving through the forest and densely wooded terrain this pack will carry 2000+ Cubic Inches of equipment.

MSRP: \$336.67
Add \$50 for Multicam
Part #: 11-00119

CONTRACTOR BAG AND ROLLING FRAME NEW

FS has engineered a lighter more durable rolling frame that has proven to be tough enough to drag around behind you with an FS Bag on top of it! Taking advantage of advanced design in both tubing and material structure we have managed to drop some weight and maintain or increase strength in key areas. This system features top loading through a large generous zipper closed portal and has reinforced secured handles that can be used to offset the pull of the bag behind you so as not to clip your heels or for those times when you find yourself pulling two. Since all of the First Spear Professional Users we talked to about this bag claim to have never used it in the conduct of Raids or Ambushes we decided to release it in some more travel friendly colors!

MSRP: \$339.98,
Part #: 90-00060

APPROACH NEW

Practicality, style and special purpose all come together in the First Spear Approach a shoulder bag with some features that make it uniquely FS! Taking advantage of purposed directed feedback and experience we have put together a bag that will support you and look cool doing it. The Approach will hold larger size laptops in a stable, stiffened compartment, a large internal zipper compartment segregates the interior further with two mesh zippered pockets for further organization.

A full length front zippered pocket is accessible just under the flap and two deep open top mesh water bottle pockets are on each side but that is just the beginning of what the Approach can do. Simple strap handle are on each end of the bag so that it is easy to pull around your body or out of overhead storage on the plane and a comfortable top center handle is available to you for when you want to go to "Samsonite" mode.

For those of you who concealed carry and are tired of putting your sidearm in the bowels of some courier bag to never be seen again relax, FS has you covered because the Approach integrates with the Line 1 Belt to seamlessly hold your SSV holster in a ready position in the same place every time. A Tubes Stretch Strap can secure the bag around your body, be stashed under the flap for when you need it or stuffed in the bag. The whole surface area under the front flap accepts the full range of FS Ragnar Pockets. About the only thing you won't find on the Approach is MOLLE Webbing and "Tactical" colors. Look for further sizes and shapes of the Approach coming out this Spring.

MSRP: \$159.99,
Part #: 11-00131

R37 RIFLE WRAP NEW

WEIGHT: 3.650 lbs
 MSRP: \$321.98,
 Add \$25 for Multicam
 Part #: 11-00107
 Blast Mat - MSRP: \$42.98
 (black or coyote only)
 Part#: 15-00367

Bridging the gaps between a shooting mat, a weapons case and a drag bag, the R37 Rifle Wrap provides capabilities that can aid in both effective training and operational deployment. The R37's exterior has attachment points for 3D camouflage to aid in signature disruption and a reinforced webbing attachment point for drag & haul straps located at the forward taper of the wraps exterior.

The Rifle Wrap can transport long-guns or carbines with a simple folding procedure and the carry handle can have its balance point adjusted by Tubes attachment points. The R37 can be transported by the FS 2" Standard Break-Away Sling, ECP Shoulder Straps or our Padded Speed Bag Shoulder Straps. When laid out flat the R37 is a comfortable pad to shoot from and two 6/12 pocket attachment fields provide area for optional pockets to store Binocs, Wind Gauges and other essential items of target engagement.

The First Spear ECP can be attached to the outside of the Rifle Wrap to give you some sustainment capability and the front of the carrier will attach a blast cloth which can be weighted down along its front edge with a long pocket designed to hold earth or rocks, staked down or tied down with sewn loops. This blast cloth will aid in minimizing dust and debris being kicked up by muzzle blast.

The R37 Rifle Wrap will hold your weapon and equipment securely and is sized to fit into a variety of hard sided weapons storage cases.

ARMS CASE NEW

The FS Arms Case is not only the perfect stand-alone transportation case for your carbine or rifle and accessories, but can also be inserted into several different hard cases as a modular padded insert that can be arranged to your specific needs. Currently offered in two sizes: Carbine (36") & Rifle (43"). Both will accept scoped weapons with standard 20 or 30 round magazines attached. FS Patented 6/12 attachment panes let you customize the AC to best suit your mission.

SPEED BAG

Inspired by the older generation of IDF (Issue Duffel Bag) the Speed Bag has many thought out features that have evolved with modern PPE. Optional components for the Speed Bag let you add further organization and padding protection. At one end of the Speed Bag is a zippered mesh pouch that fits the FirstSpear Helmet Hut. This same compartment can also be used to separate wet/dirty clothing and equipment from other gear within the bag. An external zippered pocket on the opposite end is sized for rapid access of smaller essential items or fits a fully loaded FirstSpear Fight Strap. Two full-length zippered compartments on each side of the bag are sized to fit short-barreled rifles, sub-guns, or a breaching shotgun. The main compartment of the Speed Bag is accessed by a full-length zipper and is configured to fit a complete set of body armor, equipped AGB and uniform. The exterior of the Speed Bag is all business and durability. Over-sized nylon webbing handles can be used as a hasty shoulder strap, a reinforced bottom panel of ballistic nylon, and a small organizer pocket on the outside are all standard. A square of Velcro pile lets you attach your FS Cell Tag to the outside making your Speed Bag quickly identifiable, loops integrated into the reinforced webbing straps that are the webbing handles can be used as security attachments for fastening the Speed Bag down to vehicles or aircraft.

LCS SLING W/2" BREAK AWAY BUCKLE (See accessories section)

SPEED BAG 6/12™ ORGANIZER PANEL: Taking along some extra pockets with you in your Speed Bag that you may or may not need? Want to keep those pockets organized and available in a hurry? Try the Speed Bag organizer panel. It quickly attaches to the side interior of the Speed Bag via provided "G" Hooks. The panel has a loop on one end that will let you hang it on a hook, nail or door knob while you reconfigure your kit for your next operation.

SPEED BAG REINFORCED LONG HAUL SHOULDER STRAPS: These straps attach to the top portion of the Speed Bag via provided "G" Hooks and are designed to transport the bag comfortably for longer movements. The Shoulder Straps can be stored within their own tunnels on the top of the bag, preventing them from getting caught or tangled on other equipment.

SPEED BAG WEAPON INSERT PANEL: These panels will fit into the compartments located on each side of the bag and protect weapons or broken down weapon components. Additionally, the panels can be folded out flat for weapons maintenance or used as a hasty mat for shooting on unfriendly surfaces.

HOTEL 23 PACK SYSTEM™

A mid-size pack system, the Hotel 23, incorporates many unique features requested by members of Special Mission Units who frequently carry a combination of a precision rifle and a carbine or PDW. Tunnel flaps on the sides of the Hotel 23 can securely transport a telescoped SPR. Additional features accommodate discreet deployment and storage of a spotting scope, Manfrotto® tripod and other equipment. The top flap of the Hotel 23 is a courier style bag that can be used from the ORP going forward or on its own to support travel requirements. Whether you are pushing out on your next real time operation or evading post-apocalyptic zombies on an evasion tour of central Texas, the HOTEL 23 is ready!

PUNISHER PACK E/12 MOLLE COMPATIBLE

MK32 Multi Shot 40MM Grenade Launcher

Mission oriented backpack that holds the Multi Shot 40 MM Grenade launcher. The pack is designed for quick deployment and utilizes FirstSpear® 6/12™ platform technology; allowing attachment of either standard MOLLE-style pouches or FirstSpear® ultra-lightweight 6/12™ pouches to the outside of the bag.

Ragnar™ Pockets

MSRP: \$39.98
Add \$8 for Multicam
Part #: 15-00440

FIGHT STRAPS: 5.56, 7.62, AK-47, MP5, P90, UMP

The Fight Strap is a rapidly accessible and quickly deployed magazine bandoleer that can be used for resupply or direct action. Light weight, low profile and easily donned, the Fight Strap holds 5 magazines. A looped handle makes it easy to pull the Fight Strap out of the ECP or Comm Pack, and this same handle can be used to carabineer several straps together in resupply. The Fight Strap can be worn over clothing or armor, or as an augment to your AGB or other Load Carriage Platforms.

This is a simple piece of equipment that can be used to help define your specific load needs in training or as a force augmentation in operational scenarios.

30 round 5.56 fits all M4 style magazines,
G36 PMag & HK33/53/93

20 round 7.62 fits M14, M110/Mk11/SR25,

M4 3 AND 2 MAG SR SHINGLE, W/ PISTOL POCKETS NEW

Originally developed at the request of a Federal Special Operations Group this pocket will hold three M4 magazines and three pistol magazines. The M4 pockets are polymer reinforced and precision fitted to retain one 30 round 5.56X45 (three total) magazine partially exposed to facilitate a speed reload. FS speed tabs provide additional retention and can be easily removed if not desired. The three pistol pockets will hold a variety of magazines from single stack .45 all the way up to double stack HK .45. Pistol pockets come with FS speed reload tabs and full flaps configured by the user.

Available in 6/9™ attachment style only.

HYBRID 5.56 MAG SHINGLE (6/12™ & 6/9™) NEW

A 3-Section Magazine Pocket that takes many of the preferred security and concealment features and integrates them into one system. Designed for a Speed Reload on the Shooters left or right and full flap pockets beside, this pocket also features a pistol mag pocket that can be secured with the FS Standard Speed Tab or with a supplied full flap. This pocket allows the Shooter to comfortably transport 5 30 round 5.56 magazines and one pistol magazine. This pocket is available with the Speed Reload / Pistol Pocket arranged on the Shooters Left or Right.

NIGHT VISION GOGGLE (NVG) POCKET NEW

Let's face it, sometimes darkness overtakes us due to target focus and other factors, occasionally forcing us to scramble for our NVG's. This FS storage solution not only fits your dual tube and binocular style Vision Augmentation Systems, but holds them with the mount in place so that once you access the system you can immediately snap it on to your helmet shroud. Oversized enough to accommodate spare essentials like batteries and cleaning supplies, padded and secure, you will want to make this item part of your load-out if you work with Night Vision.

MULTI ACCESS RADIO MISSION POUCH FOR AN/PRC-148 OR 152, 6/9™

This pouch allows the user to directly view the key frequency and input screen or can be configured to allow a second party to service the radio while still on the User's equipment. An opening at the bottom allows for a quick battery change without the need to remove the radio from the pouch. Shock cord retention and a speed tab secure the radio, while still allowing manipulation of the volume, frequency dial and other key controls on top of the radio.

HELMET COVERS

HELMET COVER SOLID STRETCH - OPS CORE

HELMET COVER HYBRID - OPS CORE

HELMET COVER HYBRID - MICH/ACH

Individually sized and 100% fit tested the FirstSpear Helmet Cover is designed to fit the Ops Core Maritime Cut or FAST Helmet, as well as the MICH/ACH. A stretch fit ensures that it remains in place during Free Fall or Rotary Wing Operations and key areas of the cover have been manufactured to allow access to night vision mounts and rail accessories. Loop is positioned in other locations for attachment of IFF capabilities. Perfect for changing your helmet's pattern, preserving its finish and dampening noise during impact, this cover is available in either a stretch solid/knit mesh "hybrid" or as an all solid stretch. **WEIGHT: 0.10 lbs**

Size: 1" x 5"
Weight: 0.015 lbs
MSRP: \$17.12

CELL TAG (IFF)

FirstSpear® has pioneered a unique and effective way to identify key and specific personnel under passive and thermal night vision systems. Utilizing the latest reflective glo tapes and precision cutting and bonding processes, this item will relay a call sign, identifier or other information on the exterior of the Users' clothing or equipment. This capability can be tailored to include overt illumination glow tape, passive NIR or thermal. Additionally, any combination of the three can be incorporated as requested.

WEIGHT: 0.290 lbs

MSRP: \$47.82, Add \$5 for Multicam

BLACK COYOTE RANGER GREEN MULTICAM

FirstSpear's™ solution for rapidly loading the MK32 Multi Shot Grenade Launcher

The Engagement Ring holds six 40 MM rounds configured to fit into the cylinder of the MK32. The ring has two integral modes of resistance, the first stop provides the necessary torque to cock the MK32 and the second stop drops all six grenades into the cylinder. This lets the grenadier cock and load the MK32 with one motion. A mission specific pouch holds the Engagement Ring in a ready to deploy position and attaches to the lower left and right section of the Punisher MK32 Pack.

Patent Pending

6/9™ BELT LINK **NEW**

The FS 6/9 BeltLink makes it simple to attach any of the popular 6/9 attachment-style FirstSpear pouches to an AGB or similar duty-style belt.

shown with AGB, sold separately

MISSING LINK™

Missing Link™ is a FirstSpear® solution to an ongoing User equipment challenge. Previously, pockets had to be built with a different attachment system to make them work on a belt vs. a vest or other platform. The Missing Link™ allows you to use a standard MOLLE attaching strap and affix it directly to your AGB. With the Missing Link™, there is no sloppy interface or shift in the position of your pockets. This product will work with MOLLE style pockets or belts not made by FirstSpear®, but it works best with ours! Patent Pending.

BLACK COYOTE RANGER GREEN MULTICAM

SLING, MULTI POINT, QUICK RELEASE CAPABLE

The FirstSpear® Multi Point Sling makes the selection of "which style sling for my unit, team etc." a no brainer. Incorporating the best features of 1, 2 & 3 points, the Multi Point features a Quick Release buckle system and rapid adjust feature facilitating proper marksmanship tension and rapid assumption of firing positions from standing to prone. This sling can be rigged to most weapons as a 1, 2 or 3 point sling (Note: additional hardware may be required if your firearm does not have a single point adapter already on it). A removable pad is included for additional comfort.

WEIGHT: 0.67 lbs

MSRP: \$85.68 Add \$12 for Multicam

Part #: 15-00010

BLACK COYOTE RANGER GREEN MULTICAM

SLING ATTACHMENT, M4 RECEIVER TUBE

This sling attachment can be attached to the stock tube of M4 style rifles and used as either a single point or part of a two or three point sling. Solid and fully rotating, the hole on the mount is beveled out to accept the flat hooks used on FirstSpear® slings. This sling attachment is an excellent option for Users or Organizations that want a non-invasive means of mounting a single point sling to their carbine without going to armorer-level disassembly of their weapon.

MSRP: \$53.55

Part #: 18-00003

SLING ATTACHMENT, RAIL GRABBER

This sling attachment can be fastened to any Picatinny Rail and used as part of a two or three point sling. Solid and fully rotating, the hole on the mount is beveled out to accept the flat hooks used on FirstSpear® slings.

MSRP: \$42.84

Part #: 18-00004

TWO-POINT QR SLING

Rapidly adjustable with wide padding for comfort, this product has a proven quick release system that allows the User to break out of the sling quickly. Perfect for light or heavy weapons.

SSV™ PISTOL HOLSTER NEW

WORKS GREAT WITH:
Line one belt, AGB

WEIGHT: 3.11 lbs

MSRP: \$574.98
Add \$25 for Multicam

Part #: 12-00145

Rather than just another molded pistol holster, FirstSpear® wanted to give our Armed Professionals a complimentary capability to their sidearm. Utilizing the latest in signature suppressive materials and construction techniques, the SSV™ Holster takes into account the full range of modern pistol craft manipulation. This holster will live up to the CQB axiom of: Speed, Surprise & Violence of action!

- Modular security retention that can be changed to accommodate your preferred method of carry
- Adjustable tension to give you the precise snatch stroke that you require.
- Tension can be set with any modern pistol cartridge case by turning the external screw located over the trigger guard area of the holster.
- Exterior face constructed to mask visual and Near Infrared (NIR) signature; aiding in overall silhouette suppression as seen by your opponent.

Like all other FirstSpear® Products the SSV™ holster will integrate into an overall system approach that will lighten your load, reduce your signature and keep you streamlined for the fight. This holster will adapt into future FirstSpear® equipment platforms that will aid in better concealment and transportation of your sidearm.

SOFT BELT HOLSTER

Fitting several mid-sized autos (226, G19) this holster is adaptable to either the Line 1 or AGB belts. Utilizes a traditional and adjustable thumb break as well as a grommet hole placed to facilitate a secondary retention from elastic shock cord if that is a SOP you utilize. Belt/body side of holster has a grip enhancement flap to aid in stability and smooth draw, exterior flap is slick to prevent "printing" while being used for discreet carry.

WORKS GREAT WITH: AGB, Line 1 Belt

Part#: 13-00021

Weight: 0.27 lbs

MSRP: \$55.69, Add \$4 for Multicam

AOR1 & AOR2 available for authorized Users

THE WALT TORSO HOLSTER

The Walt is a front-mount torso holster that accepts a varied number of large and medium frame semi-automatic pistols. Using classic design inputs with cutting edge materials and hardware, the Walt securely positions your sidearm. A Quick Release buckle secures the muzzle end of the holster to the AGB for a consistent draw. Weather resistant materials make the Walt ideal for a multitude of uses when a belt-mounted holster is not practical. It is also extremely handy when telling people to get off your lawn.

Fits 1911, M9, 226, Glock, M&P, XD and other pistols of similar size.

Does not fit a pistol equipped with a light or optic.

Part#: 13-00016

Weight: 0.5 lbs

MSRP: \$96.39

DAS DING™

Engineered for discreet carry or transportation of Survival, Evasion, Recovery, and Escape gear, the Ding gives you the ability to transport a sidearm, spare mags etc. when you remove your primary tactical load carriage. The stretch nature of the Das Ding lets you wear it around your waist and under your load carriage. Grip enhancement panels on the inside of the pockets and security stretch cords are included and can be attached as required. This item can be worn empty under your load carriage platform and blouse. Available in 4 sizes (S, M, L, XL), corresponding to the AGB.

WORKS GREAT WITH: LINE 1 BELT
PART #: 15-00037 **WEIGHT:** 0.5 lbs
MSRP: \$103.98, Add \$30 for Multicam

ASSAULTERS GUN BELT (AGB)

Where the rubber meets the road, the Assaulters Gun Belt (AGB) is all about function. Accessed through a two-point, high strength metallic buckle, the AGB will facilitate combat equipped buddy drags. It can be integrated with the OAGRE™ for additional equipment space and also accommodates many different FirstSpear® components to allow optimization for the full spectrum of tactical and discretionary operations. Update for the venerable Assaulters Gun Belt, now with patterned nylon webbing in MultiCam and AOR1 or AOR2 to authorized recipients.

WORKS GREAT WITH: Patrolling Suspenders, Missing Link™, & Soft Belt Holster

Shown with AGB & Padded AGB 6/12™ Sleeve, not included

LOW PROFILE TACTICAL SUSPENDERS

Designed to support the additional weight of the Padded AGB 6/12™ Sleeve, particularly when ballistic inserts or multiple pockets are attached. These suspenders are fully adjustable and low profile so that they can be worn under any FirstSpear® Load and Armor Platform.

WORKS GREAT WITH: PADDED AGB 6/12™ SLEEVE
Part#: 15-00193
WEIGHT: 0.320 lbs
MSRP: \$47.82, Add \$5 for Multicam

LINE ONE BELT-BIOTHANE®

Borrowing its name from an old NSW term for first level of clothing or gear, the Line One Belt has amazing tactical performance that maintains the high level of comfort and mobility usually associated with leather. Urethane covered Nylon provides superior strength and weather-resistance - this belt won't crack, peel, or become stiff in frigid temperatures. Specially tempered, non-slip coating eliminates "break-in" time and allows for flex like leather, yet it is impervious to sweat and water and will not stretch or lose its original shape. An excellent platform for concealed carry or for just keeping your pants up with style!

Part#: 15-00085
MSRP: \$55.69

Shown with AGB, not included

PADDED AGB SLEEVE 6/12™

This sleeve fits over the AGB or similar gun belt to provide support, comfortable padding and additional load-bearing capability; compatible with both standard MOLLE-style pouches and the ultra-lightweight FirstSpear® 6/12™ pouch line. D-Rings included to attach to multiple suspension system harnesses.
Patent Pending

MSRP: \$149.95, Add \$12 for Multicam

TACTICAL HAND-WARMER

Fleece-lined, the Tactical Hand-Warmer can be attached directly to your platform or worn on its own with a strap that stows inside of itself. An attached storage bag allows the system to be packed up small and tight. The Tactical Hand Warmer has additional pockets to hold "shake and warms" or other essential items. Cuffs allow for changes in length.

Part#: 15-00088
WEIGHT: 0.54 LBS
MSRP: \$116.274, Add \$8 for Multicam

stowable waist strap

THE ASSET™ SHIRT NEW

Developed and engineered to be a gunfighters best friend, the Asset lives up to its name. Utilizing the best in material technology to be the perfect compliment to your protective equipment system. The Asset offers high heat and flash flame protection, cut generous in the neck to accommodate balaclavas or neck sleeves the torso is Polartec Flame Retardant and has a thinner, wicking mesh in the armpits that is fast drying and treated with stink minimizing anti-microbial finish. Fitted with a slight stretch the Asset is cut long so that it will remain tucked in your pants through individual movement. The sleeves of the Asset are made out of FirstSpear P Aramid which is a Kevlar based flame retardant fabric that is extremely flame and heat resistant but also has very high abrasion resistance and durability. This sleeve will protect the User from the punishing heat of suppressors and rifle barrels and allow you to stay in the fight longer. Standard on the Asset are the low profile Velcro attachment points for FS Cell Tags and IFF, FS standard cuff tab and a pocket on each sleeve also manufactured out of FS P Aramid. Closer fitting but still to your standard FS size.

WORKS GREAT WITH:

All FS platforms,
Wind Cheater

Part#: 14-00010
MSRP: \$ 195.00

WIND CHEATER NEW

Designed to support you when the Other Guy is too much and the Asset is not enough. The Wind Cheater has a Durable Water Repellent (DWR) and excellent wind shedding characteristics, it is also quiet and quite flexible. Great compression, a large hood that will fit over helmets and a generous cut that does not hinder you are just a few of the Wind Cheater's features. Standard on the WC are the low profile Velcro attachment points for FS Cell Tags and IFF, FS standard cuff tab and a pocket on each sleeve. Made throughout with Duro Ambush. Works great with the Woobie.

Part #: 14-00011
MSRP: \$175.00, Add \$20 for Multicam

SQUADRON SMOCK

A hybrid garment that may be used as a uniform top, a weather barrier, or even as a hasty load carriage item. An oversized hood will fit over your helmet, even with night vision attached, and an easily adjusted stiffener in the bill will help keep the shape. Loaded with pockets and features, the Squadron Smock has a loose fit to accommodate additional layers. Oversized buttons that interface into slightly undersized holes provide security from windblast received in open vehicles or helicopters. The Squadron Smock has so much character that Colonel Sir David Stirling would have worn it.

Part#: 14-00007

Weight: 2.6 lbs

MSRP: \$395.00, Add \$50 for Multicam

COMBAT ANORAK NEW

FirstSpear® clothing was designed to function with your overall fighting system. The Combat Anorak exemplifies this vision. Oversized, to work with you when in helmet and body armor, the Combat Anorak has a unique feature which can make a critical difference – a single quick pull exposes the center of your load carriage and allows rapid access to reloads and other critical assets. Wind and water resistant, it may be stored inside its own carry pouch and fits into an external GP Pocket or the cargo bin on your pants.

Retaining all of the operational enhancing features of the previous design, the Combat Anorak has been redesigned for 2013 with lighter weight and lower bulk materials. We have added reinforcement in key areas to make this item both more durable and lighter weight.
